Material Safety Data Sheet

Halocarbon R-113 (1,1,2-Trichlorotrifluoroethane)

Section 1. Chemical product and company identification

Product name : Halocarbon R-113 (1,1,2-Trichlorotrifluoroethane)

Supplier : AIRGAS INC., on behalf of its subsidiaries

259 North Radnor-Chester Road

Suite 100

Radnor, PA 19087-5283

1-610-687-5253

Product use : Synthetic/Analytical chemistry.

Synonym : Ethane, 1,1,2-trichloro-1,2,2-trifluoro-; 1,1,2-Trichloro-1,2,2-trifluoroethane; 1,2,

2-Trichlorotrifluoroethane; Algofrene 113; TTE; Refrigerant 113; Halocarbon 113;

Genetron 113; Freon 113; CFC-113

Date of Preparation/

Revision

MSDS#

: 001098 : **7/22/2014**.

In case of emergency : 1-866-734-3438

Section 2. Hazards identification

Physical state : Liquid. [COLORLESS TO WATER-WHITE LIQUID WITH AN ODOR LIKE CARBON

TETRACHLORIDE (AT HIGH CONCENTRATIONS) [NOTE: A GAS ABOVE 118 F.]]

Emergency overview : CAUTION!

MAY CAUSE TARGET ORGAN DAMAGE, BASED ON ANIMAL DATA.

Contact with rapidly expanding gases can cause frostbite.

Target organs: May cause damage to the following organs: blood, liver, heart, gastrointestinal tract,

cardiovascular system, upper respiratory tract, skin, central nervous system (CNS).

Routes of entry : Inhalation Dermal Eyes

Potential acute health effects

Eyes : Slightly irritating to the eyes.

Skin : Irritating to skin.

Inhalation: Acts as a simple asphyxiant.

Ingestion : Ingestion is not a normal route of exposure for gases

Potential chronic health effects

Chronic effects: May cause target organ damage, based on animal data.

Target organs : May cause damage to the following organs: blood, liver, heart, gastrointestinal tract,

cardiovascular system, upper respiratory tract, skin, central nervous system (CNS).

Medical conditions aggravated by over-

exposure

: Pre-existing disorders involving any target organs mentioned in this MSDS as being at risk may be aggravated by over-exposure to this product.

See toxicological information (Section 11)

Section 3. Composition, Information on Ingredients

Name CAS number % Volume Exposure limits

Build 1.1 Page: 1/7

Halocarbon R-113 (1,1, 76-13-1 100 ACGIH TLV (United States, 3/2012).

2-Trichlorotrifluoroethane) TWA: 1000 ppm 8 hours. TWA: 7670 mg/m³ 8 hours. STEL: 1250 ppm 15 minutes.

STEL: 9590 mg/m3 15 minutes.

OSHA PEL 1989 (United States, 3/1989).

TWA: 1000 ppm 8 hours. TWA: 7600 mg/m³ 8 hours. STEL: 1250 ppm 15 minutes. STEL: 9500 mg/m3 15 minutes. NIOSH REL (United States, 1/2013).

TWA: 1000 ppm 10 hours. TWA: 7600 mg/m³ 10 hours. STEL: 1250 ppm 15 minutes. STEL: 9500 mg/m3 15 minutes. OSHA PEL (United States, 6/2010).

TWA: 1000 ppm 8 hours. TWA: 7600 mg/m³ 8 hours.

Section 4. First aid measures

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

Eye contact : Check for and remove any contact lenses. Immediately flush eyes with plenty of water

for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical

attention immediately.

: In case of contact, immediately flush skin with plenty of water for at least 15 minutes Skin contact

while removing contaminated clothing and shoes. Wash clothing before reuse. Clean

shoes thoroughly before reuse. Get medical attention immediately.

Frostbite : Try to warm up the frozen tissues and seek medical attention.

Inhalation : Move exposed person to fresh air. If not breathing, if breathing is irregular or if

respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention

immediately.

Ingestion : Wash out mouth with water. Do not induce vomiting unless directed to do so by medical

personnel. Never give anything by mouth to an unconscious person. Get medical

attention immediately.

Section 5. Fire-fighting measures

Flammability of the product : Non-flammable.

Decomposition products may include the following materials: **Products of combustion**

> carbon dioxide carbon monoxide halogenated compounds

carbonyl halides

Fire-fighting media and : Use an extinguishing agent suitable for the surrounding fire. instructions

In a fire or if heated, a pressure increase will occur and the container may burst.

: Fire-fighters should wear appropriate protective equipment and self-contained breathing **Special protective** equipment for fire-fighters apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Build 1.1 Page: 2/7

Section 6. Accidental release measures

Personal precautions

: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8).

Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up

: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Handling

: Wash thoroughly after handling.

Storage

: Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure controls/personal protection

Engineering controls

: No special ventilation requirements. Good general ventilation should be sufficient to control worker exposure to airborne contaminants. If this product contains ingredients with exposure limits, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure below any recommended or statutory limits.

Personal protection

Eyes

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

Skin

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory

: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

Hands

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the

Personal protection in case of a large spill

product.

TWA: 1000 ppm 8 hours. TWA: 7600 mg/m³ 8 hours.

Consult local authorities for acceptable exposure limits.

Section 9. Physical and chemical properties

Molecular weight : 187.37 g/mole Molecular formula : C2-Cl3-F3 **Boiling/condensation point** : 47.7°C (117.9°F) : -35°C (-31°F) **Melting/freezing point** : 214.1°C (417.4°F) **Critical temperature**

Vapor pressure : @ 70°F (21.1°C) = 5.6 psia (38.6 kPa)

Vapor density : 6.5 (Air = 1) Specific Volume (ft 3/lb) : 0.6349 Gas Density (lb/ft 3) 1.575

Section 10. Stability and reactivity

Stability and reactivity : The product is stable.

Incompatibility with various

substances

products **Hazardous polymerization**

Hazardous decomposition

: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

: Under normal conditions of storage and use, hazardous polymerization will not occur.

: Highly reactive or incompatible with the following materials: metals.

IDLH : 2000 ppm

Chronic effects on humans : CARCINOGENIC EFFECTS: A4 (Not classifiable for humans or animals.) by ACGIH.

> May cause damage to the following organs: blood, liver, heart, gastrointestinal tract, cardiovascular system, upper respiratory tract, skin, central nervous system (CNS).

Other toxic effects on

humans

No specific information is available in our database regarding the other toxic effects of this material to humans.

Specific effects

Carcinogenic effects No known significant effects or critical hazards. : No known significant effects or critical hazards. **Mutagenic effects Reproduction toxicity** : No known significant effects or critical hazards.
