Material Safety Data Sheet

Halocarbon R-401A

Section 1. Chemical product and company identification

Product name : Halocarbon R-401A

Supplier: AIRGAS INC., on behalf of its subsidiaries

259 North Radnor-Chester Road

Suite 100

Radnor, PA 19087-5283

1-610-687-5253

Product use : Synthetic/Analytical chemistry.

MSDS # : 002086

Date of Preparation/ : 2/26/2014.

Povision

Revision

4 000 704 0400

In case of emergency : 1-866-734-3438

Section 2. Hazards identification

Physical state : Gas. [Liquefied Gas]

WARNING!

CONTAINS MATERIAL THAT MAY CAUSE TARGET ORGAN DAMAGE, BASED ON

ANIMAL DATA.

CONTENTS UNDER PRESSURE.

Do not puncture or incinerate container. Contains material that may cause target organ

damage, based on animal data.

Contact with rapidly expanding gases can cause frostbite.

Target organs: Contains material which may cause damage to the following organs: kidneys, liver,

spleen, cardiovascular system, upper respiratory tract, central nervous system (CNS).

Routes of entry : Inhalation

Potential acute health effects

Eyes : Contact with rapidly expanding gas may cause burns or frostbite.

Skin : Contact with rapidly expanding gas may cause burns or frostbite.

Inhalation : Acts as a simple asphyxiant.

Ingestion : Ingestion is not a normal route of exposure for gases

Potential chronic health effects

Target organs : Contains material which may cause damage to the following organs: kidneys, liver,

spleen, cardiovascular system, upper respiratory tract, central nervous system (CNS).

Medical conditions aggravated by over-

exposure

: Pre-existing disorders involving any target organs mentioned in this MSDS as being at

risk may be aggravated by over-exposure to this product.

See toxicological information (Section 11)

Section 3. Composition, Information on Ingredients

Name CAS number % Volume Exposure limits

Chlorodifluoromethane (Halocarbon 22) 75-45-6 53 ACGIH TLV (United States, 1/2009).

TWA: 3540 mg/m³ 8 hour(s). TWA: 1000 ppm 8 hour(s).

NIOSH REL (United States, 6/2009).

STEL: 4375 mg/m³ 15 minute(s). STEL: 1250 ppm 15 minute(s). TWA: 3500 mg/m³ 10 hour(s). TWA: 1000 ppm 10 hour(s).

Build 1.1 Page: 1/7

OSHA PEL 1989 (United States, 3/1989).

TWA: 3500 mg/m³ 8 hour(s). TWA: 1000 ppm 8 hour(s).

2837-89-0 34 AIHA WEEL (United States, 1/2009). Chlorotetrafluoroethane (Freon 124)

TWA: 1000 ppm 8 hour(s).

1,1-Difluoroethane (Halocarbon 152A) 75-37-6 13 AIHA WEEL (United States, 1/2009).

TWA: 1000 ppm 8 hour(s).

Section 4. First aid measures

No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

: Check for and remove any contact lenses. Immediately flush eyes with plenty of water **Eye contact**

for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical

attention immediately.

: In case of contact, immediately flush skin with plenty of water for at least 15 minutes Skin contact

while removing contaminated clothing and shoes. Wash clothing before reuse. Clean

shoes thoroughly before reuse. Get medical attention immediately.

Frostbite : Try to warm up the frozen tissues and seek medical attention.

Inhalation Move exposed person to fresh air. If not breathing, if breathing is irregular or if

respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention

immediately.

Ingestion : As this product is a gas, refer to the inhalation section.

Section 5. Fire-fighting measures

Flammability of the product

: Non-flammable.

Auto-ignition temperature

: Lowest known value: 632.05°C (1169.7°F) (chlorodifluoromethane).

Flammable limits

: Greatest known range: Lower: 3.7% Upper: 18% (1,1-difluoroethane)

Products of combustion

: Decomposition products may include the following materials:

carbon dioxide carbon monoxide halogenated compounds

carbonyl halides

Fire-fighting media and instructions

: Use an extinguishing agent suitable for the surrounding fire.

Apply water from a safe distance to cool container and protect surrounding area. If involved in fire, shut off flow immediately if it can be done without risk.

Contains gas under pressure. In a fire or if heated, a pressure increase will occur and

the container may burst or explode.

Special protective equipment for fire-fighters Fire-fighters should wear appropriate protective equipment and self-contained breathing

apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions

: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment (section 8). Shut off gas supply if this can be done safely. Isolate area until gas has dispersed.

Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Methods for cleaning up

: Immediately contact emergency personnel. Stop leak if without risk. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Build 1 1 Page: 2/7

Section 7. Handling and storage

Handling

: High pressure gas. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.

Storage

: Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

Section 8. Exposure controls/personal protection

Engineering controls

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Personal protection

Eyes

: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists or dusts.

Skin

: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory

: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

The applicable standards are (US) 29 CFR 1910.134 and (Canada) Z94.4-93

Hands

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Personal protection in case of a large spill

Self-contained breathing apparatus (SCBA) should be used to avoid inhalation of the product.

Product name

chlorodifluoromethane

ACGIH TLV (United States, 1/2009).

TWA: 3540 mg/m³ 8 hour(s). TWA: 1000 ppm 8 hour(s).

NIOSH REL (United States, 6/2009). STEL: 4375 mg/m³ 15 minute(s). STEL: 1250 ppm 15 minute(s). TWA: 3500 mg/m³ 10 hour(s).

OSHA PEL 1989 (United States, 3/1989).

TWA: 1000 ppm 10 hour(s).

1-chloro-1,2,2,2-tetrafluoroethane

AIHA WEEL (United States, 1/2009).

TWA: 1000 ppm 8 hour(s).

1,1-difluoroethane

AIHA WEEL (United States, 1/2009).

TWA: 1000 ppm 8 hour(s).

Consult local authorities for acceptable exposure limits.

Build 1.1 Page: 3/7

Section 9. Physical and chemical properties

Melting/freezing point : -117°C (-178.6°F) This is based on data for the following ingredient: 1,1-difluoroethane.

Weighted average: -160.36°C (-256.6°F)

Critical temperature : Lowest known value: 96.2°C (205.2°F) (chlorodifluoromethane).

Vapor density : Highest known value: 3 (Air = 1) (chlorodifluoromethane). Weighted average: 2.88

(Air = 1)

Gas Density (lb/ft 3) : Weighted average: 0.21

Section 10. Stability and reactivity

Stability and reactivity

: The product is stable.

Incompatibility with various substances

: Highly reactive or incompatible with the following materials: organic materials, metals

and alkalis.

Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should

not be produced.

Hazardous polymerization: Under normal conditions of storage and use, hazardous polymerization will not occur.

Section 11. Toxicological information

<u>Toxicity data</u>	<u>city data</u>						
Product/ingredient name	Result	Species	Dose	Exposure			
chlorodifluoromethane	LD Oral	Rat	>43200 ug/kg	-			
	LC50 Inhalation Gas.	Rat	35 pph	15 minutes			
1-chloro-1,2,2,2-tetrafluoroethane	LC50 Inhalation Gas.	Rat	600000 ppm	1 hours			
1,1-difluoroethane	LDLo Oral	Rat	>1500 mg/kg	-			

Chronic effects on humans : CARCINOGENIC EFFECTS: Classified A4 (Not classifiable for humans or animals.) by

ACGIH, 3 (Not classifiable for humans.) by IARC [chlorodifluoromethane].

Contains material which may cause damage to the following organs: kidneys, liver, spleen, cardiovascular system, upper respiratory tract, central nervous system (CNS).

Other toxic effects on

humans

: No specific information is available in our database regarding the other toxic effects of

this material to humans.

Specific effects

Carcinogenic effects
 Mutagenic effects
 No known significant effects or critical hazards.
 Reproduction toxicity
 No known significant effects or critical hazards.

Section 12. Ecological information

Aquatic ecotoxicity

Not available.

Products of degradation: carbon oxides (CO, CO₂) and water, halogenated compounds.

Environmental fate : Not available.

Environmental hazards: No known significant effects or critical hazards.

Toxicity to the environment : Not available.

Section 13. Disposal considerations

Product removed from the cylinder must be disposed of in accordance with appropriate Federal, State, local regulation.Return cylinders with residual product to Airgas, Inc.Do not dispose of locally.
