

## SAFETY DATA SHEET

# 2261

### 1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

#### 1.1 Product identifier

**Product name** 3 COMPONENT MIXTURE (10% C<sub>2</sub>H<sub>6</sub>, 5% CO<sub>2</sub>, BALANCE CH<sub>4</sub>)

**Synonym(s)** 2261 - SDS NUMBER • 3-COMPONENT GAS MIXTURE

#### 1.2 Uses and uses advised against

**Use(s)** CALIBRATION • INDUSTRIAL APPLICATIONS

#### 1.3 Details of the supplier of the product

**Supplier name** BOC LIMITED (AUSTRALIA)

**Address** 10 Julius Avenue, North Ryde, NSW, 2113, AUSTRALIA

**Telephone** 131 262, (02) 8874 4400

**Fax** 132 427 (24 hours)

**Website** <http://www.boc.com.au>

#### 1.4 Emergency telephone number(s)

**Emergency** 1800 653 572 (24/7) (Australia only)

### 2. HAZARDS IDENTIFICATION

#### 2.1 Classification of the substance or mixture

CLASSIFIED AS HAZARDOUS ACCORDING TO AUSTRALIAN WHS REGULATIONS

**GHS classification(s)** Gases Under Pressure: Compressed gas  
Flammable Gases: Category 1

#### 2.2 Label elements

**Signal word** DANGER

**Pictogram(s)**

#### Hazard statement(s)

H220 Extremely flammable gas.  
H280 Contains gas under pressure; may explode if heated.

#### Prevention statement(s)

P210 Keep away from heat/sparks/open flames/hot surfaces. No smoking.

#### Response statement(s)

P377 Leaking gas fire: Do not extinguish, unless leak can be stopped safely.  
P381 Eliminate all ignition sources if safe to do so.

#### Storage statement(s)

P410 + P403 Protect from sunlight. Store in a well-ventilated place.

#### Disposal statement(s)

None allocated.

**2.3 Other hazards**

Asphyxiant. Effects are proportional to oxygen displacement.

---

**3. COMPOSITION/ INFORMATION ON INGREDIENTS**

---

**3.1 Substances / Mixtures**

| Ingredient     | CAS Number | EC Number | Content (v/v) |
|----------------|------------|-----------|---------------|
| METHANE        | 74-82-8    | 200-812-7 | Remainder     |
| ETHANE         | 74-84-0    | 200-814-8 | 10%           |
| CARBON DIOXIDE | 124-38-9   | 204-696-9 | 5%            |

---

**4. FIRST AID MEASURES**

---

**4.1 Description of first aid measures**

|                             |                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Eye</b>                  | None required.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Inhalation</b>           | If inhaled, remove from contaminated area. To protect rescuer, use an Air-line respirator or Self Contained Breathing Apparatus (SCBA). Be aware of possible explosive atmospheres. Apply artificial respiration if not breathing. Give oxygen if available. Contact a Poisons Information Centre on 13 11 26 (Australia Wide) or a doctor. For advice, contact a Poison Information Centre on 13 11 26 (Australia Wide) or a doctor. |
| <b>Skin</b>                 | None required.                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Ingestion</b>            | Due to product form and application, ingestion is considered unlikely.                                                                                                                                                                                                                                                                                                                                                                |
| <b>First aid facilities</b> | No information provided.                                                                                                                                                                                                                                                                                                                                                                                                              |

**4.2 Most important symptoms and effects, both acute and delayed**

In high concentrations may cause asphyxiation. Symptoms may include loss of mobility / consciousness. Victim may not be aware of asphyxiation. Low concentrations of CO<sub>2</sub> cause increased respiration and headache.

**4.3 Immediate medical attention and special treatment needed**

Treat symptomatically.

---

**5. FIRE FIGHTING MEASURES**

---

**5.1 Extinguishing media**

Stop flow of gas if safe to do so, such as by slowly closing the cylinder valve.

**5.2 Special hazards arising from the substance or mixture**

Extremely flammable. Eliminate all ignition sources including cigarettes, open flames, spark producing switches/tools, heaters, naked lights, pilot lights, mobile phones etc. when handling.

**5.3 Advice for firefighters**

This material is capable of forming explosive mixtures in air. Temperatures in a fire may cause cylinders to rupture and internal pressure relief devices to be activated. This product will add fuel to a fire. Cool cylinders exposed to fire by applying water from a protected location. Do not approach cylinders suspected of being hot.

**5.4 Hazchem code**

|     |                                                                                                              |
|-----|--------------------------------------------------------------------------------------------------------------|
| 2SE |                                                                                                              |
| 2   | Fine Water Spray.                                                                                            |
| S   | Risk of violent reaction or explosion. Wear full fire kit and breathing apparatus. Dilute spill and run-off. |
| E   | Evacuation of people in and around the immediate vicinity of the incident should be considered.              |

---

**6. ACCIDENTAL RELEASE MEASURES**

---

**6.1 Personal precautions, protective equipment and emergency procedures**

If the cylinder is leaking, evacuate area of personnel. Inform manufacturer/supplier of leak. Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe. Ensure adequate air ventilation. Eliminate all sources of ignition. Consider the risk of potentially explosive atmospheres.

**6.2 Environmental precautions**

Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous.

**6.3 Methods of cleaning up**

Carefully move material to a well ventilated remote area, then allow to discharge if safe to do so. Do not attempt to repair leaking valve or cylinder safety devices.

**6.4 Reference to other sections**

See Sections 8 and 13 for exposure controls and disposal.

---

**7. HANDLING AND STORAGE**

---

**7.1 Precautions for safe handling**

Before use carefully read the product label. Use of safe work practices are recommended to avoid eye or skin contact and inhalation. The uncontrolled release of a gas under pressure may cause physical harm. When handling gas cylinders, the use of appropriate mechanical handling devices is recommended.

**7.2 Conditions for safe storage, including any incompatibilities**

Do not store near sources of ignition or incompatible materials. Cylinders should be stored below 45°C in a secure area, upright and restrained to prevent cylinders from falling. Cylinders should also be stored in a dry, well ventilated area constructed of non-combustible material with firm level floor (preferably concrete), away from areas of heavy traffic and emergency exits.

**7.3 Specific end use(s)**

No information provided.

---

**8. EXPOSURE CONTROLS / PERSONAL PROTECTION**

---

**8.1 Control parameters****Exposure standards**

| Ingredient                   | Reference | TWA        |                   | STEL  |                   |
|------------------------------|-----------|------------|-------------------|-------|-------------------|
|                              |           | ppm        | mg/m <sup>3</sup> | ppm   | mg/m <sup>3</sup> |
| Carbon dioxide               | SWA (AUS) | 5000       | 9000              | 30000 | 54000             |
| Carbon dioxide in coal mines | SWA (AUS) | 12500      | 22500             | 30000 | 54000             |
| Ethane                       | SWA (AUS) | Asphyxiant |                   |       |                   |
| Methane                      | SWA (AUS) | Asphyxiant |                   |       |                   |

**Biological limits**

No biological limit values have been entered for this product.

**8.2 Exposure controls**

**Engineering controls** Avoid inhalation. Use in well ventilated areas. Where an inhalation risk exists, mechanical explosion proof extraction ventilation is recommended. Flammable/explosive vapours may accumulate in poorly ventilated areas. Maintain vapour levels below the recommended exposure standard.

**PPE**

|                    |                                                                                                            |
|--------------------|------------------------------------------------------------------------------------------------------------|
| <b>Eye / Face</b>  | Wear safety glasses.                                                                                       |
| <b>Hands</b>       | Wear leather gloves.                                                                                       |
| <b>Body</b>        | Wear safety boots.                                                                                         |
| <b>Respiratory</b> | Where an inhalation risk exists, wear Self Contained Breathing Apparatus (SCBA) or an Air-line respirator. |

---

**9. PHYSICAL AND CHEMICAL PROPERTIES**

---

|             |       |
|-------------|-------|
| % Volatiles | 100 % |
|-------------|-------|

---

**10. STABILITY AND REACTIVITY**

---

**10.1 Reactivity**

Carefully review all information provided in sections 10.2 to 10.6.

**10.2 Chemical stability**

Stable under recommended conditions of storage.

**10.3 Possibility of hazardous reactions**

Polymerization will not occur.

**10.4 Conditions to avoid**

Avoid heat, sparks, open flames and other ignition sources.

**10.5 Incompatible materials**

Moist carbon dioxide is corrosive, hence acid resistant materials are required (e.g. stainless steel). Certain properties of some plastics and rubbers may be affected by carbon dioxide (i.e. embrittlement, leaching of plasticisers, etc).

**10.6 Hazardous decomposition products**

This material will not decompose to form hazardous products other than that already present.

---

**11. TOXICOLOGICAL INFORMATION**

---

**11.1 Information on toxicological effects**

|                          |                                                                                                                                                                                |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acute toxicity           | Based on available data, the classification criteria are not met. Low concentrations of carbon dioxide cause increased respiration and headache.                               |
| Skin                     | Not classified as a skin irritant.                                                                                                                                             |
| Eye                      | Not classified as an eye irritant.                                                                                                                                             |
| Sensitization            | Not classified as causing skin or respiratory sensitisation.                                                                                                                   |
| Mutagenicity             | Not classified as a mutagen.                                                                                                                                                   |
| Carcinogenicity          | Not classified as a carcinogen.                                                                                                                                                |
| Reproductive             | Not classified as a reproductive toxin.                                                                                                                                        |
| STOT – single exposure   | Asphyxiant. Effects are proportional to oxygen displacement. Over exposure may result in dizziness, drowsiness, weakness, fatigue, breathing difficulties and unconsciousness. |
| STOT – repeated exposure | Not classified as causing organ effects from repeated exposure.                                                                                                                |
| Aspiration               | Not classified as causing aspiration.                                                                                                                                          |

## 12. ECOLOGICAL INFORMATION

### 12.1 Toxicity

No information provided.

### 12.2 Persistence and degradability

No information provided.

### 12.3 Bioaccumulative potential

No information provided.

### 12.4 Mobility in soil

No information provided.

### 12.5 Other adverse effects

When discharged into the atmosphere, methane and carbon dioxide may contribute to the greenhouse effect. Methane has a global warming potential of 21 (CO2 = 1). Avoid discharge of this material into the atmosphere.

## 13. DISPOSAL CONSIDERATIONS

### 13.1 Waste treatment methods

**Waste disposal** Cylinders should be returned to the manufacturer or supplier for disposal of contents.

**Legislation** Dispose of in accordance with relevant local legislation.

## 14. TRANSPORT INFORMATION

CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE

**PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:**

The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

**HEALTH EFFECTS FROM EXPOSURE:**

It should be noted that the effects from exposure to this product will depend on several factors including: frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a ChemAlert report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.

**PRODUCT NAME    3 COMPONENT MIXTURE (10% C<sub>2</sub>H<sub>6</sub>, 5% CO<sub>2</sub>, BALANCE CH<sub>4</sub>)**

**Report status**

This document has been compiled by RMT on behalf of the manufacturer, importer or supplier of the product and serves as their Safety Data Sheet ('SDS').

It is based on information concerning the product which has been provided to RMT by the manufacturer, importer or supplier or obtained from third party sources and is believed to represent the current state of knowledge as to the appropriate safety and handling precautions for the product at the time of issue. Further clarification regarding any aspect of the product should be obtained directly from the manufacturer, importer or supplier.

While RMT has taken all due care to include accurate and up-to-date information in this SDS, it does not provide any warranty as to accuracy or completeness. As far as lawfully possible, RMT accepts no liability for any loss, injury or damage (including consequential loss) which may be suffered or incurred by any person as a consequence of their reliance on the information contained in this SDS.
