

SAFETY DATA SHEET

1986

Product Name 3 COMPONENT MIXTURE (C2H6 <10%, C3H8 <10%, BALANCE N2)

1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Supplier name BOC LIMITED (AUSTRALIA)

Address 10 Julius Avenue, North Ryde, NSW, 2113, AUSTRALIA

Telephone 131 262, (02) 8874 4400 **Fax** 132 427 (24 hours)

Emergency 1800 653 572 (24/7) (Australia only)

Web site http://www.boc.com.au/

Synonym(s) 1986 - MSDS NUMBER • PRODUCT CODES: 285 , 288 • SPECIAL GAS MIXTURE

Use(s) CALIBRATION • INDUSTRIAL APPLICATIONS

SDS date 08 January 2014

2. HAZARDS IDENTIFICATION

NOT CLASSIFIED AS HAZARDOUS ACCORDING TO SAFE WORK AUSTRALIA CRITERIA

RISK PHRASES

None allocated

SAFETY PHRASES

None allocated

CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE

UN number 1954 **DG** division 2.1

Packing group None Allocated Subsidiary risk(s) None Allocated

Hazchem code 2SE

3. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredient	Identification	Classification	Content
ETHANE	CAS: 74-84-0 EC: 200-814-8	F+;R12	>3%
PROPANE	CAS: 74-98-6 EC: 200-827-9	F+;R12	>2%
NITROGEN	CAS: 7727-37-9 EC: 231-783-9	Not Available	Remainder

4. FIRST AID MEASURES

Eye None required.

Inhalation If inhaled, remove from contaminated area. To protect rescuer, use an Air-line respirator or Self

Contained Breathing Apparatus (SCBA). Be aware of possible explosive atmospheres. Apply artificial respiration if not breathing. Give oxygen if available. For advice, contact a Poison Information Centre

on 13 11 26 (Australia Wide) or a doctor.

Skin None required.

Ingestion Due to product form and application, ingestion is considered unlikely.

ChemAlert.

Page 1 of 6

SDS Date: 08 Jan 2014

Advice to doctor Treat symptomatically.

5. FIRE FIGHTING MEASURES

Flammability Flammable. May evolve toxic gases (carbon/ sulphur/ nitrogen oxides, hydrocarbons) when heated to

decomposition. Eliminate all ignition sources including cigarettes, open flames, spark producing

switches/tools, heaters, naked lights, pilot lights, mobile phones etc. when handling.

Fire and explosion

Temperatures in a fire may cause cylinders to rupture. Cool cylinders or containers exposed to fire by

applying water from a protected location. Do not approach cylinders or containers suspected of being hot. Remove cool cylinders from the path of the fire. Evacuate area if unable to keep cylinders cool.

This material is capable of forming explosive mixtures in air.

Extinguishing Stop flow of gas if safe to do so, such as by slowly closing the cylinder valve.

Hazchem code 2SE

2 Water Fog (or fine water spray if fog unavailable)

S Self Contained Breathing apparatus and protective gloves.

E Evacuation of people in the vicinity of the incident should be considered.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions If the cylinder is leaking, evacuate area of personnel. Inform manufacturer/supplier of leak. Wear

self-contained breathing apparatus when entering area unless atmosphere is proved to be safe. Ensure adequate air ventilation. Eliminate ignition sources. Consider the risk of potentially explosive

atmospheres.

Environmental precautions Prevent from entering sewers, basements and workpits, or any place where its accumulation can be

dangerous.

Methods of cleaning upCarefully move material to a well ventilated remote area, then allow to discharge if safe to do so. Do

not attempt to repair leaking valve or cylinder safety devices.

References See Sections 8 and 13 for exposure controls and disposal.

7. STORAGE AND HANDLING

Storage Store in a cool (< 45°C), well ventilated secure area, removed from incompatible substances, heat or ignition sources and foodstuffs. Ensure cylinders are tightly closed, outlet seek are replaced after

ignition sources and foodstuffs. Ensure cylinders are tightly closed, outlet seals are replaced after use, are stored in an upright position, prevented from falling and in a secure location. If in cylinders,

ensure they are protected from physical damage and not stored near emergency exits.

Handling Use of safe work practices are recommended to avoid inhalation. Do not drag, drop, slide or roll

cylinders. The uncontrolled release of a gas under pressure may cause physical harm. Use a

suitable hand truck for cylinder movement.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure standards

Ingredient	Reference	TWA		STEL	
Ingredient		ppm	mg/m³	ppm	mg/m³
Ethane	SWA (AUS)	Asphyxiant			
Nitrogen	SWA (AUS)		Asph	yxiant	
Propane	SWA (AUS)		Asph	yxiant	

Biological limits No biological limit allocated.

Engineering controls Provide suitable ventilation to minimise or eliminate exposure. Confined areas (eg. tanks) should be

adequately ventilated or gas tested. Flammable/explosive vapours may accumulate in poorly

ventilated areas.

SDS Date: 08 Jan 2014

Page 2 of 6

PPE

Eye / FaceWear safety glasses.HandsWear leather gloves.BodyWear safety boots.

Respiratory Where an inhalation risk exists, wear Self Contained Breathing Apparatus (SCBA) or an Air-line

respirator.

9. PHYSICAL AND CHEMICAL PROPERTIES

COLOURLESS GAS Appearance Odour **ODOURLESS Flammability FLAMMABLE** Flash point **NOT AVAILABLE Boiling point** NOT AVAILABLE **Melting point** NOT AVAILABLE **Evaporation rate NOT APPLICABLE NOT APPLICABLE** Vapour density **NOT AVAILABLE** Specific gravity **NOT APPLICABLE** Solubility (water) 0.0149 L/L (Nitrogen) Vapour pressure **NOT AVAILABLE Upper explosion limit** NOT AVAILABLE

Lower explosion limit 6 % (Propane plus ethane in nitrogen)

Explosive propertiesNOT AVAILABLE **Oxidising properties**NOT AVAILABLE

% Volatiles 100 %

Cylinder pressure (when full) 13000 kPa @ 15°C

10. STABILITY AND REACTIVITY

Chemical stability Stable under recommended conditions of storage.

Conditions to avoid Avoid shock, friction, heavy impact, heat, sparks, open flames and other ignition sources.

Material to avoid Incompatible with oxidising agents (eg. hypochlorites), acids (eg. nitric acid), heat and ignition

sources. Do not use natural rubber flexible hoses. Also incompatible (potentially violently) with

oxygen, halogens and metal halides.

Hazardous Decomposition

Products

May evolve toxic gases (carbon/ sulphur/ nitrogen oxides, hydrocarbons) when heated to

decomposition.

Hazardous Reactions Polymerization will not occur.

11. TOXICOLOGICAL INFORMATION

Health Hazard Summary Asphyxiant gas. Symptoms of exposure are directly related to displacement of oxygen. As the amount of oxygen inhaled is reduced from 21-14% volume, the pulse rate may accelerate and the rate and volume of breathing may increase. The ability to maintain attention and think clearly is diminished, muscular co-ordination is somewhat disturbed. As oxygen decreases from 14-10% volume, judgement becomes faulty, severe injuries may result in no pain. Muscular effort may lead to rapid fatigue. Further reduction to 6% may result in nausea and vomiting. Ability to move may be lost. Permanent brain damage may result even after resuscitation from exposure to this low level of oxygen. Below 6% breathing is in gasps and convulsions may occur. Inhalation of a mixture containing no oxygen may result in unconsciousness from the first breath and death may follow in minutes.

Eye Non irritant.

Inhalation Asphyxiant. Effects are proportional to oxygen displacement. Acts as a simple asphyxiant by

displacing oxygen in the lungs thereby diminishing the supply of oxygen to the blood and tissues.

Skin Non irritant.

ChemAlert.

Page 3 of 6 SDS Date: 08 Jan 2014

Ingestion Ingestion is considered unlikely due to product form.

Toxicity data PROPANE (74-98-6)

LC50 (inhalation) > 800000 ppm/15M (rat)

12. ECOLOGICAL INFORMATION

Toxicity No information provided.

Persistence and degradability No information provided.

Bioaccumulative potential No information provided.

Other adverse effects No information provided.

13. DISPOSAL CONSIDERATIONS

Mobility in soil

Waste disposal Cylinders should be returned to the manufacturer or supplier for disposal of contents.

Legislation Dispose of in accordance with relevant local legislation.

No information provided.

14. TRANSPORT INFORMATION

CLASSIFIED AS A DANGEROUS GOOD BY THE CRITERIA OF THE ADG CODE

	LAND TRANSPORT (ADG)	SEA TRANSPORT (IMDG / IMO)	AIR TRANSPORT (IATA / ICAO)
UN number	1954	-	-
Proper shipping name	COMPRESSED GAS, FLAMMABLE, N.O.S.	-	-

Subsidiary risk(s)	None Allocated	-	-
Packing group	None Allocated	-	-
GTEPG	2A1		
Hamaham aada	005		

Hazchem code 2SE

Commonwealth, State and Territory Dangerous Goods Legislation which contain requirements which

affect gas storage and transport.

15. REGULATORY INFORMATION

Poison schedule A poison schedule number has not been allocated to this product using the criteria in the Standard

for the Uniform Scheduling of Medicines and Poisons (SUSMP).

Inventory Listing(s) AUSTRALIA: AICS (Australian Inventory of Chemical Substances)

All components are listed on AICS, or are exempt.

16. OTHER INFORMATION

Additional information The storage of significant quantities of gas cylinders must comply with AS4332 The storage and

handling of gases in cylinders.

ChemAlert.

SDS Date: 08 Jan 2014

Page 4 of 6

3 COMPONENT MIXTURE (C2H6 <10%, C3H8 <10%, BALANCE N2)

ASPHYXIANTS (1): When present in the atmospheres in high concentrations, asphyxiants reduce the oxygen concentration by displacement. Atmospheres deficient in oxygen do not provide adequate sensory warning of danger and most simple asphyxiants are odourless. Therefore it is not appropriate to recommend an exposure standard for each asphyxiant, but to maintain oxygen concentrations. However, some asphyxiants may be given an exposure standard due to the potential for narcotic effects at high concentrations or an explosion hazard.

ASPHYXIANTS (2): There is a significant hazard associated with workers entering poorly ventilated areas (eg. tanks) where oxygen may be deficient. An air supplied breathing apparatus may be required if adequate ventilation is not ensured.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES:

The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

HEALTH EFFECTS FROM EXPOSURE:

It should be noted that the effects from exposure to this product will depend on several factors including: frequency and duration of use; quantity used; effectiveness of control measures; protective equipment used and method of application. Given that it is impractical to prepare a ChemAlert report which would encompass all possible scenarios, it is anticipated that users will assess the risks and apply control methods where appropriate.

Report status

This document has been compiled by RMT on behalf of the manufacturer, importer or supplier of the product and serves as their Safety Data Sheet ('SDS').

It is based on information concerning the product which has been provided to RMT by the manufacturer, importer or supplier or obtained from third party sources and is believed to represent the current state of knowledge as to the appropriate safety and handling precautions for the product at the time of issue. Further clarification regarding any aspect of the product should be obtained directly from the manufacturer, importer or supplier.

While RMT has taken all due care to include accurate and up-to-date information in this SDS, it does not provide any warranty as to accuracy or completeness. As far as lawfully possible, RMT accepts no liability for any loss, injury or damage (including consequential loss) which may be suffered or incurred by any person as a consequence of their reliance on the information contained in this SDS.
