**Eyes:** Can cause severe irritation, burns and destruction of tissue. May cause permanent damage and blindness.  
**Skin:** May cause tissue destruction and severe burns. A latent period may exist between exposure and sense of irritation.  
**Inhalation:** Vapors or mist may cause damage to the upper respiratory tract and to the lung tissue.  
**Ingestion:** Can cause very serious damage to the mouth, esophagus, stomach and other contacted tissues and may be fatal. Aspiration into the lungs during vomiting may cause chemical pneumonitis and pulmonary edema/hemorrhage.

**Eyes:** Immediately flush with plenty of water for at least 15 minutes. Hold eyelids open during flushing. Call a physician or poison center immediately.

**Skin:** Flush area with water while removing contaminated clothing. Follow by washing with soap and water. If irritation persists, call a physician or poison center.
