

# **ENZYMES** Glucose Oxidase Concentrate Ex. Aspergillus niger

**Section 1: Product and Company Identification** 

Material name Glucose Oxidase Concentrate Ex. Aspergillus niger

**Synonyms** Glucose oxidase concentrate

**Product No.** 70-6644-01

**Product description** Aqueous solution containing enzyme (protein) and salt.

**Product use** Enzyme reagent for laboratory use.

**Section 2: Hazards Identification** 

OSHA regulatory status This preparation is not classified as hazardous under U.S. OSHA 29 CFR 1910.1200;

E.C. Directive 1999/45/EC; Canadian R.S. 1985, c. H-3; U.K. CHIP 2002 No. 1689; and/or U.N. GHS ST/SG/AC 10/30. Refer to Sec. 15, Regulatory Information, for details

regarding hazard classification.

None of the components present in this preparation at concentrations equal to or greater

than 0.1% are listed by IARC, NTP, OSHA or ACGIH as a carcinogen.

Precautionary statements CAUTION! The chemical, physical and toxicological properties of this preparation have

not been thoroughly characterized. Avoid contact with eyes and skin. Do not ingest or

inhale. Preparation appearance: yellow to golden-brown liquid.

Potential health effects:

**Routes of exposure** Occupational exposure routes may include eye contact, skin contact and inhalation.

**Eyes**No data available. Eye exposure may cause irritation, redness and itching. **Skin**No data available. Skin contact may cause irritation, dryness and redness.

Inhalation

No data available. Although there is no evidence that the enzyme(s) in this preparation induces specific respiratory hypersensitivity, all proteins are potential respiratory allergens and may result in respiratory sensitization in certain individuals after repeated and/or prolonged inhalation exposure, producing mild to severe symptoms similar to pollen

prolonged inhalation exposure, producing mild to severe symptoms similar to pollen allergy or asthma, including mucous membrane or eye irritation, itching of the skin or eyes, sneezing, nasal or sinus congestion, coughing, and tightness in the chest. These

symptoms may develop as late as 12 hours after exposure.

**Ingestion** Ingestion of large amounts of monosodium glutamate may cause headache, weakness,

stiffness, heartburn, burning sensation, and tightness and numbness in the face and

neck.

**Chronic effects**No data available. Repeated inhalation may result in respiratory sensitization.

Target organs Unknown.

Potential environmental effects No data available.

### **Section 3:** Composition / Information on Ingredients

Ingredient Name	CAS #	EC#	% (wt/wt)
Monosodium glutamate	142-47-2	205-538-1	40 - 60
EC R-Phrases: None	EC Hazard Class: None		
Water	7732-18-5	231-791-2	40 - 60
EC R-Phrases: None	EC Hazard Class: None		
Glucose oxidase	9001-37-0	232-601-0	1 - 5
FC R-Phrases: None	FC Hazard Class: None		

NOTE - Glucose oxidase - Enzyme source: Aspergillus niger, Enzyme Commission number: 1.1.3.4

### **Section 4:** First Aid Measures

First aid procedures:

**Eye contact** Immediately flush eyes with plenty of tepid water for 15 minutes while separating eyelids

with fingers. Remove contact lenses if worn. Obtain medical attention if needed or if

symptoms, such as redness or irritation persist.

**Skin contact** In case of contact, flush skin with cool water and remove contaminated clothing. Obtain

medical attention if needed or if irritation or other symptoms develop.

**Inhalation** If inhaled, move from exposure area to fresh air. Seek medical attention if breathing

becomes difficult or if cough or other symptoms develop.

**Ingestion** In case of ingestion, contact a poison control center or physician for instructions.

**Fire Fighting Measures Section 5:** 

Flammable properties Dilute aqueous solution not considered a fire hazard.

Suitable extinguishing media Use extinguishing media suitable for surrounding fire, such as carbon dioxide, chemical

foam, dry chemical or water spray.

Unsuitable extinguishing media Specific hazards arising from

Unknown. None expected.

the chemical Standard protective equipment Firefighters should wear NIOSH-approved or equivalent Self-Contained Breathing

and precautions for firefighters Apparatus and full protective gear.

**Section 6: Accidental Release Measures** 

Personal precautions Avoid physical contact with material and avoid aerosol inhalation. Wear Personal

Protective Equipment (PPE) as indicated in Section 8. Wash hands thoroughly after

handling.

**Environmental precautions** 

No information available.

Methods and materials for containment and clean-up

Absorb spill with inert material/sorbent. Decontaminate the spill site following standard procedures. Dispose of materials in accordance with all applicable federal, state, local

and provincial environmental regulations, per Section 13.

**Section 7: Handling and Storage** 

Handling Follow good laboratory hygiene practices. See Section 8, Engineering Controls. Minimize

contact and contamination of personal clothing and skin. Wash hands thoroughly after

handling.

Storage Store at 2 - 8°C (36 - 46°F). Do not store with incompatible substances; see Section 10.

**Section 8: Exposure Controls / Personal Protection** 

**Exposure guidelines** There are no ACGIH, NIOSH, OSHA or country-specific occupational exposure limits

currently established for components present in this preparation at concentrations equal

to or greater than 1% (0.1% if carcinogen).

**Engineering controls** Use in well ventilated areas. If handling large quantities or there is a potential for dust or

aerosol generation, use local exhaust ventilation. Facilities storing or using this material

should be equipped with an eyewash fountain and a safety shower.

Personal protective equipment:

Eye / face protection Wear appropriate protective chemical safety glasses.

Wear lab coat or other protective garments. Remove contaminated clothing promptly. Skin protection

Wear chemical resistant protective gloves. Hand protection

Respiratory protection A respirator is not required under normal conditions of use.

General Follow company-specific safety procedures.

### **Section 16: Other Information**

### **Further Information:**

This MSDS has been prepared in accordance with the ANSI Z400.1 format. Every effort has been made to adhere to the hazard criteria and content requirements of the U.S. OSHA Hazard Communication Standard, Canadian Controlled Products Regulation (CPR), UK Chemical Hazard Information and Packaging Regulations, European Communities REACH Regulation, and UN Globally Harmonized System of Classification and Labelling of Chemicals.

MSDS Origination Date: 28 February, 2006
