Safety Data Sheet

1. Identification

AEGIS MSP WET MIX

GHS Product Identifier
Parchem Construction Supplies Pty Ltd (ABN 80 069 961 968)

Address
7 Lucca Road Wyong
NSW 2259 Australia

Telephone/Fax
Tel: 02 4350 5000
Fax: 02 4351 2024

Emergency number
1800 638 556 (available 24/7)

Recommended use of the chemical and restrictions on use
Additive for Aegis MSP

Other Information
This MSDS summarises at the date of issue our best knowledge of the health and safety hazard information of the product, and in particular how to safely handle and use the product in the workplace. Since Parchem Construction Supplies Pty Ltd cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, review this MSDS in the context of how the user intends to handle and use the product in the workplace.

If clarification or further information is needed to ensure that an appropriate assessment can be made, the user should contact this company. Our responsibility for product as sold is subject to our standard terms and conditions, a copy of which is sent to our customers and is also available upon request.

www.parchem.com.au

2. Hazard Identification

Not classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.

Not classified as Dangerous Goods according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. (7th edition)

3. Composition/information on ingredients

4. First-aid measures

Inhalation
If inhaled, remove affected person from contaminated area. Keep at rest until recovered. If symptoms persist seek medical attention.

Ingestion
Do NOT induce vomiting. Wash out mouth with water. If symptoms develop seek medical attention.

Skin
Wash affected area thoroughly with soap and water. Remove contaminated clothing and wash before reuse or discard. If symptoms develop seek medical attention.

Eye contact
If in eyes, hold eyelids apart and flush the eyes continuously with running water. Continue flushing for several minutes until all contaminants are washed out completely. If symptoms develop and persist seek medical attention.

First Aid Facilities
Eye wash and normal washroom facilities.

Advice to Doctor
Treat symptomatically.

Other Information
For advice in an emergency, contact a Poisons Information Centre (Phone Australia 13 1126; New Zealand 0800 POISON / 0800 764 766) or a doctor at once.

5. Fire-fighting measures
Use carbon dioxide, dry chemical, foam, water fog or water mist.

Under fire conditions this product may decompose and produce irritating fumes and gases including oxides of nitrogen, carbon monoxide and carbon dioxide.

This product is non-combustible. However, following evaporation of aqueous component under fire conditions, the non-aqueous component may decompose and/or burn.

177°C (onset of polymer decomposition)

Fire fighters should wear Self-Contained Breathing Apparatus (SCBA) and full protective clothing to prevent exposure to vapours, fumes or products of combustion. Water spray may be used to cool down heat-exposed containers.

Wear appropriate personal protective equipment and clothing to minimise exposure. Increase ventilation. If possible contain the spill. Place inert absorbent material onto spillage. Collect the material and place into a suitable labelled container. Do not dilute material but contain. Dispose of waste according to the applicable local and national regulations. If contamination of sewers or waterways occurs inform the local water and waste management authorities in accordance with local regulations.

Use only in a well ventilated area. Keep containers sealed when not in use. Prevent the build up of mists or vapours in the work atmosphere. Avoid inhalation of vapours and mists, and skin or eye contact. Maintain high standards of personal hygiene i.e. Washing hands prior to eating, drinking, smoking or using toilet facilities.

Store in a cool, dry, well-ventilated area, out of direct sunlight. Store in suitable, labelled containers. Keep containers closed when not in use. Ensure that storage conditions comply with applicable local and national regulations.

No exposure value assigned for this specific material by Safe Work, Australia. However, over-exposure to some chemicals may result in enhancement of pre-existing adverse medical conditions and/or allergic reactions and should be kept to the least possible levels. As with all chemicals, exposure should be kept to the lowest possible levels.

No biological limit allocated.

Use with good general ventilation. If mists or vapours are produced, local exhaust ventilation should be used.

If engineering controls are not effective in controlling airborne exposure then an approved respirator with a replaceable organic vapour filter may be necessary. Reference should be made to Australian Standards AS/NZS 1715, Selection, Use and maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.

Safety glasses with side shields or chemical goggles should be worn. Final choice of appropriate eye/face protection will vary according to individual circumstances. Eye protection devices should conform with Australian/New Zealand Standard AS/NZS 1337 - Eye Protectors for Industrial Applications.

Wear gloves of impervious material. Final choice of appropriate gloves will vary according to individual circumstances i.e. methods of handling or according to risk assessments undertaken. Reference should be made to AS/NZS 2161.1: Occupational protective gloves - Selection, use and maintenance.

Suitable workwear, e.g. cotton overalls buttoned at neck and wrist should be worn.

Liquid
AEGIS MSP WET MIX

Colour: Milky white
Odour: Slight ammoniacal odour
Decomposition Temperature: 177°C (onset of polymer decomposition)
Melting Point: Not available
Boiling Point: 100°C (approximate) (water)
Solubility in Water: Completely miscible
Specific Gravity: 1.06 (23°C)
P pH: 5.5-7.5
Vapour Pressure: 24 mm Hg (25°C)
Vapour Density (Air=1): <1
Evaporation Rate: 300 cP (25°C) (approximate)
Viscosity: Not available
Flash Point: Not applicable
Flammability: Not combustible
Auto-Ignition Temperature: Not applicable
Flammable Limits - Lower: Not applicable
Flammable Limits - Upper: Not available
Kinematic Viscosity: Not available
Dynamic Viscosity: Not available

Reactivity: Reacts with incompatible materials
Chemical Stability: Stable under normal conditions of storage and handling.
Conditions to Avoid: Extremes of temperature and direct sunlight.
Incompatible Materials: Strong oxidising agents, acids and bases.
Toxicological Information: Thermal decomposition and combustion produce noxious fumes containing oxides of carbon and oxides of nitrogen.
Polymerization: Will not occur.

Acute Toxicity - Oral: LD50 (rat): >5000 mg/kg
LD50 (rabbit): >5000 mg/kg

Inhalation: Ingestion may cause irritation to the gastric tract, with stomach pain, nausea and vomiting.
Inhalation: Inhalation of product vapours may cause irritation of the nose, throat and respiratory system.
Skin: May be irritating to skin. The symptoms may include redness, itching and swelling.
Eyes: May be irritating to eyes. The symptoms may include redness, itching and tearing.
1. Safety Data Sheet

Not classified as hazardous

Respiratory sensitisation
Not expected to be a respiratory sensitiser.

Skin Sensitisation
Not expected to be a skin sensitiser.

Germ cell mutagenicity
Not considered to be a mutagenic hazard.

Carcinogenicity
Not considered to be a carcinogenic hazard.

Reproductive Toxicity
Not considered to be toxic to reproduction.

STOT-single exposure
Not considered to cause toxicity to a specific target organ.

STOT-repeated exposure
Not considered to cause toxicity to a specific target organ.

Aspiration Hazard
Not expected to be an aspiration hazard.

12. Ecological information

Ecotoxicity
No ecological data are available for this material.

Persistence and degradability
Not available

Mobility
Not available

Bioaccumulative Potential
Not available

Environmental Protection
Prevent this material entering waterways, drains and sewers.

13. Disposal considerations

Disposal Considerations
Dispose of waste according to applicable local and national regulations.

14. Transport information

Transport Information
Road and Rail Transport (ADG Code):

Marine Transport (IMO/IMDG):
Not classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea.

Air Transport (ICAO/IATA):
Not classified as Dangerous Goods by the criteria of the International Air Transport Association (IATA) Dangerous Goods Regulations for transport by air.

IMDG Marine pollutant
No

15. Regulatory information

Regulatory Information
Not classified as Hazardous according to the Globally Harmonised System of Classification and labelling of Chemicals (GHS) including Work, Health and Safety regulations, Australia.
Not classified as a Scheduled Poison according to the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP).

Poisons Schedule
Not Scheduled

Australia (AICS)
All components of this product are listed on the Australian Inventory of Chemical Substances (AICS) or exempted.

16. Other Information

Date of preparation or last revision of SDS
SDS Reviewed: August 2012
Supersedes: May 2009
