

# Safety Data Sheet

## AQUARIAN B145

### 1. Identification

Product identifier	AQUARIAN B145
Product code	B145
Other means of identification	None.
Recommended use of the chemical and restrictions on use	Boiler water treatment.
Manufacturer	AQUARIAN CHEMICALS INC. 768 Westgate Road Oakville, Ontario Canada L6L 5N2 Tel. 905-825-3711 Fax 905-825-0177 <a href="http://www.aquarianchemicals.com">www.aquarianchemicals.com</a> <a href="mailto:info@aquarianchemicals.com">info@aquarianchemicals.com</a>
Emergency phone number	Canutec: 613-996-6666

### 2. Hazard identification

Summary	CORROSIVE! Use only in well ventilated area. Avoid all contact with skin, eyes and clothing. Do not breathe vapors, mists or aerosols. Do not ingest. If ingested consult physician immediately and show this Safety Data Sheet. Wear eye protection, gloves, respiratory protection and other protective clothing that are adapted to the task being performed and the risks involved.
---------	---

#### WHMIS 2015/OSHA HCS 2012/GHS

	Acute toxicity, oral (Category 4) Skin corrosion (Category 1) Serious eye damage (Category 1) Skin sensitizer (Category 1) Specific target organ toxicity, repeated exposure (Category 2) Health hazards not otherwise classified (HHNOC)
	<b>Other hazards which do not result in classification :</b> Acute hazard to the aquatic environment (Category 3).

#### DANGER

- H314: Causes severe skin burns and eye damage
- H3xx: May cause severe respiratory tract damage
- H302: Harmful if swallowed
- H317: May cause an allergic skin reaction
- H373: May cause damage to organs through prolonged or repeated exposure
- H402: Harmful to aquatic life
- P260: Do not breathe mist, vapors and spray.
- P264: Wash face, hands and any exposed skin thoroughly after handling.
- P270: Do not eat, drink or smoke when using this product.
- P271: Use only outdoors or in a well-ventilated area.

P272: Contaminated work clothing should not be allowed out of the workplace.  
P273: Avoid release to the environment.  
P280: Wear protective gloves, protective clothing and eye protection.  
P301+330+331+P310: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician.  
P303+361+353: IF ON SKIN (or hair): Remove immediately all contaminated clothing. Rinse skin with water and soap or take a shower if necessary.  
P333+313: If skin irritation or a rash occurs: Get medical advice/attention.  
P304+340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.  
P305+351+338: IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.  
P310: Immediately call a doctor/physician.  
P362+ P364: Take off contaminated clothing and wash before reuse.  
P405: Store locked up.  
P501: Dispose of contents and container to a licensed chemical disposal agency in accordance with local, regional and national regulations.

### 3. Composition/information on ingredients

Common name	CAS	Weight % content
Water	7732-15-5	70-72%
EDTA	13235-36-4	2-3 %
Sodium Hexameta phosphate	68915-31-1	8-9 %
Sodium Hydroxide	1310-73-2	3-4 %
Goodrite K702	Mixture	12-15 %

### 4. First-aid measures

<b>Inhalation</b>	Move person to fresh air. If breathing is difficult, give oxygen by trained personnel. If not breathing, give artificial respiration. Do not use mouth-to-mouth resuscitation unless you use a buccal protective device. If a problem develops or persists, seek medical attention.
<b>Skin contact</b>	Flush with water for at least 15 minutes. Remove contaminated clothing and wash before reuse. If a problem develops or persists, seek medical attention.
<b>Eye contact</b>	IMMEDIATELY flush with plenty of water. Remove contact lenses after the first 5 minutes. Flush with water for at least 30 minutes. Hold eyelids apart to rinse properly. Do not rub your eyes. Consult a physician, preferably an ophthalmologist. Do not transport the victim until the recommended flushing period is completed, unless a portable emergency eye wash bottle is immediately available.
<b>Ingestion</b>	DO NOT induce vomiting, unless recommended by medical personnel. If victim is conscious wash out mouth with water and give 1-2 glasses of water to drink. Never give anything by mouth if victim is unconscious or convulsing. If spontaneous vomiting occurs, keep head below hips level to prevent aspiration into the lungs. Seek medical attention or contact a Poison Centre immediately.
<b>Other</b>	No information available.
<b>Symptoms</b>	Causes skin burns and eye damage. May cause an allergic reaction of the skin. Overexposure may cause burns of to nose, throat and respiratory tract.
<b>Notes to the physician</b>	Treat according to person's condition and specifics of exposure. If lavage is performed, suggest endotracheal and/or esophageal control. Danger from lung aspiration must be weighed against toxicity when considering emptying the stomach. Treatment of exposure should be directed at the control of symptoms and the clinical condition of the patient. Probable mucosal damage may contraindicate the use of gastric lavage.

## 5. Fire-fighting measures

<b>Suitable extinguishing media</b>	Dried powder, water spray, carbon dioxide (CO <sub>2</sub> ), chemical foam.
<b>Specific hazards arising from the chemical</b>	In a fire or if heated, a pressure increase will occur and the container may burst. During a fire, smoke may contain the original materials in addition to combustion products of varying composition which may be toxic and/or irritating.
<b>Special protective equipment</b>	Firefighting suit may not be efficient against chemicals. Firefighters must wear self contained breathing apparatus with full face mask.
<b>Special protective actions for fire-fighters</b>	Water spray can be used to cool equipment exposed to heat and flame. Prevent run-off from fire control or dilution from entering streams, sewers or drinking water supply.

## 6. Accidental release measures

<b>Personal precautions, protective equipment and emergency procedures</b>	Do not touch spilled material. Make sure to wear personal protective equipment mentioned in this Safety Data Sheet.
<b>Environmental precautions</b>	Prevent entry in sewer and other enclosed area. For a large spillage, consult the Department of Environment or the relevant authorities.
<b>Methods and materials for containment and cleaning up</b>	Ventilate well the area. Stop leak, if it's possible to do so without risk. Move containers from spill area. Absorb with inert material (soil, sand, vermiculite) or wipe up with a damp mop and place in an appropriate waste disposal clearly identified. Finish cleaning by rinsing with soapy water the contaminated surface. Dispose via a licensed waste disposal contractor.

## 7. Handling and storage

<b>Precautions for safe handling</b>	Use only in well ventilated area. Do not breathe vapors and mists. Avoid all contact with skin, eyes and clothing. Make sure to wear personal protective equipment mentioned in this Safety Data Sheet. Keep containers tightly closed when not used. Do not eat, do not drink and do not smoke during use. Wash hands, forearms and face thoroughly after handling this compound. Remove contaminated clothing and wash before reuse.
<b>Conditions for safe storage, including any incompatibilities</b>	Store tightly closed and in properly labelled container in a dry, cool and well ventilated place. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store away from acids and from incompatible materials (see section 10). Keep away from direct sunlight and heat. Keep off freezing.
<b>Storage temperature</b>	10 to 40°C (50 to 104°F)

## 8. Exposure controls/personal protection

<b>Immediately Dangerous to Life or Health</b>	Sodium hydroxide: 10 mg/m <sup>3</sup> .		
Sodium hydroxide	Ceiling TWA (8h)	2 mg/m <sup>3</sup> 2 mg/m <sup>3</sup>	ACGIH , BC, ON, RSST OSHA
<b>Appropriate engineering controls</b>	Provide sufficient mechanical ventilation (general and/or local exhaust) to keep the airborne concentrations of vapors, mists, aerosols or dust below their respective occupational exposure limits. Ensure that eyewash stations and safety showers are close to the workstation.		

Individual protection measures	
<b>Eye</b>	Wear chemical splash goggles. Depending on conditions of use, a face shield may be necessary.
<b>Hands</b>	Chemical-resistant, impervious gloves should be worn at all times when handling this chemical product. Wear nitrile or neoprene gloves. Before using, user should confirm impermeability. Discard gloves that show tears, pinholes, or signs of wear. Gloves must only be worn on clean hands. Wash gloves with water before removing them. After using gloves, hands should be washed and dried thoroughly.
<b>Skin</b>	Personal protective equipment for the body should be selected based on the task being performed and the risks involved. Wear an apron or long-sleeve protective coverall suit. To clean up a spill, if necessary, wear a synthetic polyethylene coveralls such as the Tychem (DuPont) or equivalent coveralls manufactured to provide protection against liquid chemical.
<b>Respiratory</b>	Respiratory protection equipment (PPE) must be selected, fitted, maintained and inspected in accordance with regulations and CSA Standard Z 94.4 and approved by NIOSH / MSHA. In case of insufficient ventilation or in confined or enclosed space and for an assigned protection factor (APF) up to 10 times the exposure limit: wear a half mask respirator with appropriate cartridges fitted with P100 filters. For an APF until maximum 100 times of exposure limit, wear a full face respirator mask with appropriate cartridges and P100 filters.
<b>Feet</b>	Wear rubber boots to clean up a spill.
 Apron                      Goggles                      Nitrile gloves	

## 9. Physical and chemical properties

<b>Physical state</b>	Liquid	<b>Flammability</b>	Non-flammable.
<b>Colour</b>	Clear	<b>Flammability limits</b>	N/Ap.
<b>Odour</b>	None	<b>Flash point</b>	N/Ap.
<b>Odour threshold</b>	N/Av.	<b>Auto-ignition temperature</b>	N/Ap.
<b>pH</b>	6 to 9	<b>Sensibility to electrostatic charges</b>	No
<b>Melting point</b>	5°C (41°F)	<b>Sensibility aux sparks and/or friction</b>	No
<b>Freezing point</b>	5°C (41°F)	<b>Vapour density</b>	N/Av. (Air = 1)
<b>Boiling point</b>	110°C (230°F)	<b>Relative density</b>	1.12 kg/L (Water = 1)
<b>Solubility</b>	Fully soluble in water.	<b>Partition coefficient n-octanol/water</b>	N/Av.
<b>Evaporation rate</b>	N/Av.	<b>Decomposition temperature</b>	N/Av.
<b>Vapour pressure</b>	N/Av.	<b>Viscosity</b>	N/Av.
<b>Percent Volatile</b>	98%	<b>Molecular mass</b>	N/Ap.
N/Av.: Not Available    N/Ap.: Not Applicable    Und.: Undetermined    N/E: Not Established			

<b>Interactive effects</b>	No information available for this product.
<b>Other information</b>	The oral acute toxicity estimate (ATE) of the mixture was calculated to be greater than 300 mg/Kg but lower than 2000 mg/kg. This value is classified according to GHS: Acute toxicity, oral (Category 4). The skin acute toxicity estimate (ATE) of the mixture was calculated to be greater than 2000 mg/kg. This value is not classified according to WHMIS and OSHA HCS 2012.

## 12. Ecological information

<b>Ecological toxicity</b>	<p>Aquatic Invertebrate - Crustaceans - Ceriodaphnia EC50 40 mg/L; 48h (Sodium hydroxide)</p> <p>Fish - Gambusia affinis - fresh water LC50 125 ppm; 96h (Sodium hydroxide)</p>
<b>Persistence</b>	No information available for this product.
<b>Degradability</b>	No information available for this product.
<b>Bioaccumulative potential</b>	No information available for this product
<b>Mobility in soil</b>	No information available for this product. The mixture's ingredients are from slightly soluble to very soluble in water. Then, the distribution of them in the environment should be between water and the soil with little partition in air.
<b>Other adverse effects</b>	The observed ecological toxicity presented by this product for the environment was considered a result of pH effects. This chemical does not deplete the ozone layer.

## 13. Disposal considerations

<b>Container</b>	Important! Prevent waste generation. Use in full. DO NOT throw residual to sewer, streams, sewers or drinking water supply. Residues and empty containers must be considered as hazardous waste. Dispose via a licensed waste disposal contractor. Observe all federal, state/provincial and municipal regulations. If necessary consult the Department of Environment or the relevant authorities.
------------------	---

## 14. Transport information

<b>UN Number</b>	UN 1760
<b>UN Proper Shipping Name</b>	CORROSIVE LIQUID, N.O.S.
<b>Environmental hazards</b>	This material does not contain marine pollutant.
<b>Special precautions for user</b>	Permit required for transportation with proper placards displayed on vehicle.
<b>TDG - Transportation of Dangerous Goods (Canada)</b>	
<b>Transport hazard class(es)</b>	 Class 8

<b>Packing group</b>	III
<b>Emergency response guidebook 2012</b>	154
<b>IMO/IMDG - International Maritime Transport</b>	
<b>Classification</b>	UN 1760. CORROSIVE LIQUID, N.O.S. Class 8, PG III. Emergency schedules (EmS-No) F-A, S-B
<b>IATA - International Air Transport Association</b>	
<b>Classification</b>	UN 1760. CORROSIVE LIQUID, N.O.S. Class 8, PG III.
These transportation classifications are provided as a customer service. As the shipper YOU remain responsible for complying with all applicable laws and regulations, including proper transportation classification and packaging. In addition, if a domestic exemption exists, it is the responsibility of the shipper to define the application of it.	

## 15. Regulatory information

### CANADA

Common name	CAS	CEPA	DSL	NDSL	NPRI
