SECTION 4 - FIRST AID MEASURES

Inhalation : If breathed in, move person into fresh air. If breathing is irregular or stopped,

administer artificial respiration. If breathing is difficult, give oxygen by qualified medical personnel only. When symptoms persist or in all cases of doubt seek

medical advice.

Skin contact : Remove/Take off immediately all contaminated clothing. Wash off immediately with

soap and plenty of water. Wash contaminated clothing before reuse. When

symptoms persist or in all cases of doubt seek medical advice.

If thermal burns are present: Treat all thermal burns with appropriate first aid measures for degree of burn. Cool skin rapidly with cold water, if material is hot.

Eye contact : In the case of contact with eyes, rinse immediately with plenty of water and seek

and dead and dead and dead with a specific and dead with profits of water and dead

medical advice.

Ingestion : Do NOT induce vomiting. Never give anything by mouth to an unconscious person.

Do not give milk. Drink plenty of water. If vomiting occurs spontaneously, keep victim's head lowered (forward) to reduce the risk of aspiration. When symptoms persist or in

all cases of doubt seek medical advice.

Notes For Physician : Treat symptomatically.

SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability

: Not flammable under normal conditions of use. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure. Vapours are heavier than air and collect in confined and low-lying areas. Material will float on water and can be re-ignited at the water's surface.

Flammability classification (OSHA 29 CFR 1910.1200)

: Combustible Liquid Class III B.

Oxidizing properties : None known.

Explosion data: Sensitivity to mechanical impact / static discharge

: Not expected to be sensitive to mechanical impact or static discharge.

Suitable extinguishing media : Dry chemical; Carbon dioxide (CO2); Foam; water fog. Do not use a solid water

stream as it may scatter and spread fire.

Special fire-fighting procedures/equipment

: Move containers from fire area if safe to do so. Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Water spray may be useful in cooling equipment exposed to heat and flame. Avoid spreading burning liquid with water spray used for cooling purposes. Do not allow run-off from fire fighting to enter drains or water courses.

Hazardous combustion products

Oxides of carbon, sulphur and phosphorus.

NFPA Rating 0 - Minimal 1 - Slight 2 - Moderate 3 - Serious 4 - Severe

: Health: 1 Flammability: 1 Instability: 0 Special Hazards: None

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions : Wear suitable protective equipment. Refer to protective measures listed in sections 7

and 8. Keep people away from and upwind of spill/leak.

Environmental precautions : Do not allow material to contaminate ground water system. If necessary, dike well

ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or

drinking supply.

Spill response/cleanup : Ventilate area of release. Remove all sources of ignition. Stop spill or leak at source

if safely possible. Contain and absorb spilled liquid with non-combustible, inert absorbent material (e.g. sand), then place absorbent material into a container for later disposal (see Section 13). Do not flush into surface water or sanitary sewer system. Contaminated absorbent material may pose the same hazards as the

spilled product. Notify the appropriate authorities as required.

Prohibited materials: None known or reported by the manufacturer.

Special spill response procedures

: If a spill/release in excess of the EPA reportable quantity is made into the

environment, immediately notify the national response center in the United States

(phone: 1-800-424-8802).

US CERCLA Reportable quantity (RQ): None reportable.

SECTION 7 - HANDLING AND STORAGE

Safe Handling procedures : Do not breathe fumes or mists. Use only in well-ventilated areas. Wear protective

gloves/clothing and eye/face protection. Avoid contact with skin, eyes and clothing. Keep away from heat and sources of ignition. Keep away from incompatibles. Keep container tightly closed. Empty containers retain residue (liquid and/or vapour) and

can be dangerous. Wash thoroughly after handling.

Storage requirements : Keep containers tightly closed in a cool, well-ventilated place. Keep away from heat.

Inspect periodically for damage or leaks. Protect against physical damage. No

smoking in the area. Keep away from incompatibles.

Incompatible materials : Oxidizing agents.

Special packaging materials : Always keep in containers made of the same materials as the supply container.
