## SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

### Pure substance

Inhalation

Eye contact

Chemical name	Common name and synonyms	CAS#	Concentration	
Distillates, petroleum, hydrotreated light	Distillates (petroleum), hydrotreated light	64742-47-8	100.00	

### SECTION 4. FIRST-AID MEASURES

### Description of first aid measures

Ingestion Call a physician or poison control centre immediately. Induce vomiting ONLY under

the direct supervision of qualified medical personnel or a poison control centre. Never

give anything by mouth to an unconscious person.

Immediately remove person to fresh air. If breathing has stopped, give artificial

respiration. Get medical attention if symptoms persist.

Immediately flush with plenty of water, while removing contaminated clothing. If Skin contact irritation persists, seek prompt medical attention. Launder clothing before reuse.

Immediately flush eye(s) with plenty of water. After initial flushing, remove any contact

lenses if worn, and continue flushing for at least 5 to 10 minutes. If irritation persists,

seek prompt medical attention.

#### Most important symptoms and effects, both acute and delayed

Aspiration hazard. Aspiration into the lungs during swallowing or subsequent vomiting may cause chemical pneumonitis, which can be fatal. Direct skin contact may cause slight or mild, transient irritation. Inhalation of high concentrations may cause dizziness, disorientation, incoordination, narcosis, nausea or narcotic effects. Direct eye contact may cause slight or mild, transient irritation. Ingestion may cause gastrointestinal irritation, nausea, vomiting and diarrhea.

#### Indication of any immediate medical attention and special treatment needed

Treat symptomatically. Aspiration hazard.

## SECTION 5. FIRE-FIGHTING MEASURES

#### Extinguishing media

Suitable extinguishing media

 Use media suitable to the surrounding fire such as water fog or fine spray, alcohol foams, carbon dioxide and dry chemical.

Unsuitable extinguishing media

: Do not use a solid water stream as it may scatter and spread fire.

#### Special hazards arising from the substance or mixture / Conditions of flammability

: Burning produces obnoxious and toxic fumes. Flammable liquid and vapour. Vapors are heavier then air and will settle and collect in low areas and pits, displacing breathing air.

### Flammability classification (OSHA 29 CFR 1910.106)

: Flammable Liquids - Category 3

#### **Hazardous combustion products**

: Carbon oxides, formaldehyde and other irritating fumes and smoke.

#### Special protective equipment and precautions for firefighters

Protective equipment for fire-fighters

: Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA.

#### Special fire-fighting procedures

Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame.

## SECTION 6. ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

: Restrict access to area until completion of clean-up. Ensure clean-up is conducted by trained personnel only. All persons dealing with clean-up should wear the appropriate protective equipment including self-contained breathing apparatus. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.

#### **Environmental precautions**

Ensure spilled product does not enter drains, sewers, waterways, or confined spaces. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or drinking supply.

## Methods and material for containment and cleaning up

: Ventilate the area. Stop spill or leak at source if safely possible. Dike for water control. Use only non-sparking tools. Contain and absorb spilled liquid with non-combustible, inert absorbent material (e.g. sand), then place absorbent material into a container for later disposal (see Section 13).

## Special spill response procedures

In case of transportation accident, contact TERRAPURE ENVIRONMENTAL at 1-800-567-7455.

US CERCLA Reportable quantity (RQ): None.

## SECTION 7. HANDLING AND STORAGE

#### Precautions for safe handling

: Wear protective gloves and eye/face protection. Keep away from heat and open flames. - No smoking. Use with adequate ventilation. Do not breathe mist or vapor. Avoid contact with eyes, skin and clothing. Wash with soap and water after handling. Keep away from acids and other incompatibles. Keep containers tightly closed when not in use. Empty containers retain residue (liquid and/or vapour) and can be dangerous.

### SAFETY DATA SHEET

Conditions for safe storage : Store in a cool, dry, well-ventilated area. Store away from areas of excessive heat,

open flames, sparks, and other possible sources of ignition. Keep away from incompatibles. Storage area should be clearly identified, clear of obstruction and accessible only to trained and authorized personnel. Inspect periodically for damage or

leaks.

Incompatible materials : Strong oxidizers (e.g. Chlorine, Peroxides, etc.).

#### SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

	<u>TWA</u>	STEL	<u>PEL</u>	<u>STEL</u>	
Distillates, petroleum, hydrotreated light	200 mg/m³ (as total hydrocarbon vapour)	N/Av	N/Av	N/Av	

### **Exposure controls**

Ventilation and engineering measures

: Use sufficient mechanical ventilation to maintain exposures below the TLV. Use local

exhaust if mist or spray is generated.

**Respiratory protection**: Respiratory protection is required if the concentrations exceed the TLV.

NIOSH-approved respirators are recommended. Seek advice from respiratory protection specialists. Respirators should be selected based on the form and concentration of contaminants in air, and in accordance with OSHA (29 CFR

1910.134) or CSA Z94.4-02.

**Skin protection**: Wear appropriate chemical resistant gloves. Advice should be sought from glove

suppliers.

**Eye / face protection**: Chemical goggles are recommended when there is a potential for splashing.

Other protective equipment : Emergency showers and eyewash facilities should be nearby. Wear a chemically

resistant apron and long sleeves when dispensing, to prevent skin contact.

General hygiene considerations

Do not breathe mist or vapor. Avoid contact with eyes, skin and clothing. When using do not eat or drink. When using do not smoke. Upon completion of work, wash hands before eating, drinking, smoking or use of toilet facilities. Remove soiled clothing and

wash it thoroughly before reuse.
