Fire Fighting	Fire Fighting Instructions: As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. Containers may explode in the heat of a fire. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Use water spray to keep fire-exposed containers cool. Vapors are heavier than air and may travel to a source of ignition and flash back. Vapors can spread along the ground and collect in low or confined areas. This liquid floats on water and may travel to a source of ignition and spread fire.

Respiratory Equipment (Specify Type):	A respiratory protection program that meets OSHA's 29 CFR 1910.134 and ANSI Z88.2 requirements or European Standard EN 149 must be followed whenever workplace conditions warrant respirator use. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced.				
Eye Protection:	Wear appropriate protective eyeglasses or chemical safety goggles as described by OSHA's eye and face protection regulations in 29 CFR 1910.133 or European Standard EN166.				
Protective Gloves:	EN166. Wear appropriate protective gloves to prevent skin exposure. Gloves must be inspected prior to use. Wash and dry hands. Material: Nitrile rubber. Minimum layer thickness: 0.4 mm Break through time: 480 min. This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any specific use scenario.				
Other Protective Clothing:	Wear appropriate protective clothing to prevent skin exposure.				
Engineering Controls (Ventilation etc.):	Use explosion-proof ventilation equipment. Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.				
Work/Hygienic/Maintenance	Handle in accordance with good industrial hygiene and safety practice. Wash hands				
Practices:	before breaks and at the end of workday.				
Environmental Exposure	Prevent further leakage or spillage if safe to do so. Do not let product enter drains.				
Controls:	Discharge into the environment must be avoided.
