DENTAL PROPHYLAXIS PASTE

CONTAINS:

Dental Prophylaxis Paste contains a unique blend of polishing and cleaning agents. Dental Prophylaxis Paste is for professional use only and is designed for application during standard dental practice hygiene procedures.

Contains fluoride at a concentration of 1.23% fluoride ion.

INDICATIONS:

For cleaning and polishing procedures as part of a professionally administered prophylaxis treatment.

NOTE: Prophylaxis pastes containing fluoride are not considered a replacement for other forms of fluoride therapy.

PRECAUTIONS:

Excessive ingestion of fluoride can cause nausea. Dental Prophylaxis Paste should be expectorated and **NOT SWALLOWED**.

SUGGESTED APPLICATIONS:

Medium: Normal cleansing, polishing and plaque removal.

Course: Heavy stain and plaque removal. Stain build-up due to heavy smoking and enamel polishing.

ADMINISTRATION:

For use only by individuals who are professionally trained in the performance of dental prophylaxis.

DIRECTIONS FOR USE:

BULK JARS: Remove sufficient paste for one procedure and place in a clean dappen dish or other suitable container.

UNIT DOSE: Each unit dose cup contains enough prophylaxis paste for one (1) prophylaxis procedure.

Use any commercially available prophylaxis angle, rubber cup combination. To fill the cup press the cup face into the paste while running the angle at low speed. To avoid overheating the tooth surface, maintain sufficient paste in the cup throughout the procedure. Evacuate saliva to avoid swallowing and/or excessive dilution of the paste.

CAUTION:

U.S. Federal Law prohibits dispensing without prescription.
