5. FIRE FIGHTING MEASURES

FLASHPOINT AND METHOD: (330.8°F) Cleveland Closed Cup

FLAMMABLE LIMITS: No data available.

EXTINGUISHING MEDIA: Use water fog, carbon dioxide, dry chemical.

HAZARDOUS COMBUSTION PRODUCTS: Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids, and gases including carbon monoxide, carbon dioxide, and unidentified organic compounds will be evolved when this material undergoes combustion.

6. ACCIDENTAL RELEASE MEASURES

SMALL SPILL: Dike or container spill. Absorb with inert material and dispose. Flush area with water. Prevent washings from entering waterways. Spills may be reportable to the National Response Center ((800) 424-8802) in the United States. Dispose of in accordance with local, state, federal or provincial regulations.

ELECTROSTATIC ACCUMULATION HAZARD: Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary but may not, by themselves, be sufficient. Review all operations, which have the potential of generating an accumulation of electrostatic charge and/or a flammable atmosphere (including tank and container filling, splash filling, tank cleaning, sampling, gauging, switch loading, filtering, mixing, agitation, and vacuum truck operations) and use appropriate mitigating procedures. For more information, refer to OSHA Standard 29 CFR 19103106, Flammable and Combustible Liquids, National Fire Protection Association (NFPA 77), Recommended Practice on Static Electricity' (liquids, powders and dusts), and/or the American Petroleum Institute (API) Recommended Practice 2003, 'Protection Against Ignitions Arising Out of Static, Lightning, and Stray Currents' (liquids).
8. EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS: Local exhaust and general ventilation must be adequate to meet exposure limit(s).

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Chemical goggles/face shield.

SKIN: Wear chemical resistant gloves such as: Neoprene, butyl or nitrile or consult your safety equipment supplier.

RESPIRATORY: Where airborne concentrations are expected to exceed exposure limits, NIOSH/MSHA certified respirators should be use.

PROTECTIVE CLOTHING: Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.

WORK HYGIENIC PRACTICES: Use good personal hygiene when handling this product. Wash hands after use, before eating, drinking, smoking, or using the toilet.
