### **SECTION 4: First aid measures**

Description of first aid measures

**Inhalation:** Move to fresh air. Treat symptomatically. Get medical attention if symptoms

persist.

**Eye contact:** Immediately flush with plenty of water for at least 15 minutes. If easy to do,

remove contact lenses. Call a physician or poison control center

immediately. In case of irritation from airborne exposure, move to fresh air.

Get medical attention if symptoms persist.

**Skin contact:** Immediately flush with plenty of water for at least 15 minutes while

removing contaminated clothing and shoes. Call a physician or poison control center immediately. Wash contaminated clothing before reuse.

Destroy or thoroughly clean contaminated shoes.

**Ingestion:** Call a physician or poison control center immediately. Do NOT induce

vomiting. If victim is fully conscious, give a cupful of water. Never give anything by mouth to an unconscious person. If vomiting occurs, keep head

lower than the hips to help prevent aspiration.

Most important symptoms and

effects, both acute and

delayed:

May irritate and cause redness and pain. Respiratory tract irritation.

Indication of any immediate medical attention and special treatment needed

Hazards: None known.

**Treatment:** Treat symptomatically.

### **SECTION 5: Firefighting measures**

**General fire hazards:** Flammable liquid and vapor.

**Extinguishing media** 

Suitable extinguishing

media:

Water spray. Dry chemical. Carbon Dioxide. Alcohol foam.

Unsuitable extinguishing

media:

None known.

Special hazards arising from

the substance or mixture:

Vapors may cause a flash fire or ignite explosively. Vapors may travel considerable distance to a source of ignition and flash back. Prevent

buildup of vapors or gases to explosive concentrations.

Advice for firefighters

This substance has workplace exposure limit(s).

Initiator: 0001 / PRD 150000001208

Special fire fighting

procedures:

Water may be ineffective in fighting the fire. Use water spray to keep fire-

exposed containers cool.

Special protective

equipment for fire-fighters:

Self-contained breathing apparatus and full protective clothing must be

worn in case of fire.

### SECTION 6: Accidental release measures

Personal precautions,

protective equipment and emergency procedures:

Wear appropriate personal protective equipment.

**Environmental precautions:** Avoid release to the environment.

Methods and material for

containment and cleaning

up:

Eliminate sources of ignition. Absorb spill with vermiculite or other inert material, then place in a container for chemical waste. Large Spillages: Use water spray to disperse vapors and flush spill area. Prevent runoff from

entering drains, sewers, or streams. Dike for later disposal.

Notification Procedures: In the event of a spill or accidental release, notify relevant authorities in

accordance with all applicable regulations.

# SECTION 7: Handling and storage:

**Precautions for safe handling:** Avoid breathing mists or vapors. Do not get in eyes, on skin, on clothing.

Do not taste or swallow. Use only with adequate ventilation. Wash

thoroughly after handling.

Conditions for safe storage,

including any incompatibilities:

Keep container tightly closed and in a well-ventilated place.

# **SECTION 8: Exposure controls/personal protection**

### Control parameters

#### Occupational exposure limits

Country specific exposure limits have not been established or are not applicable unless listed below.

Chemical name	Туре	Exposure Limit values	Source
acetic acid	TWA	10 ppm	US. ACGIH Threshold Limit Values (01 2010)
	STEL	15 ppm	US. ACGIH Threshold Limit Values (01 2010)
	PEL	10 ppm 25 mg/m3	B US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) (02 2006)

#### **Exposure controls**

Initiator: 0001 / PRD 150000001208

Appropriate engineering

controls:

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

### Individual protection measures, such as personal protective equipment

**General information:** Eye bath. Washing facilities. Safety shower.

**Eye/face protection:** Use safety goggles and face shield in case of splash risk. Wear a full-face

respirator, if needed.

Skin protection

**Hand protection:** Wear chemical-resistant gloves, footwear, and protective clothing

appropriate for the risk of exposure. Contact health and safety professional

or manufacturer for specific information.

Other: No data available.

**Respiratory Protection:** If engineering controls do not maintain airborne concentrations below

recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA Standard 63 FR 1152, January 8, 1998. Respirator type: Airpurifying respirator with an appropriate, government approved (where applicable), air-purifying filter, cartridge or canister. Contact health and

safety professional or manufacturer for specific information.

**Hygiene measures:** Observe good industrial hygiene practices.
