

SWING PAINTS LIMITED
2100 ST PATRICK STREET
MONTREAL, QC H3K 1B2
(514) 932-2157

PRODUCT: ACETONE**CODE: 5601****1. IDENTIFICATION**

PRODUCT IDENTIFIER HOME ACETONE

PRODUCT CODE 560150, 560101, 560104, 560120

RECOMMENDED USE SOLVENT

SUPPLIER SWING PAINTS LIMITED
2100 ST PATRICK STREET
MONTREAL, QC H3K 1B2
CANADA
514-932-2157

EMERGENCY PHONE NO 514-932-2157 8:00 - 17:00 EST

2. HAZARDOUS IDENTIFICATION**Hazardous Classification of the substance or mixture**

Flammable liquids	Category 2
Serious eye damage/eye irritation	Category 2A
Specific target organ toxicity, single exposure	Category 3

Hazard pictograms**Signal Word: Danger****Hazard statements**

Highly flammable liquid and vapor
Causes serious eye irritation
May cause drowsiness or dizziness
May cause respiratory irritation

Precautionary Statements**Prevention**

Wash face, hands and any exposed skin thoroughly after handling
Wear protective gloves/protective clothing/eye protection/face protection
Avoid breathing dust/fume/gas/mist/vapors/spray
Use only outdoors or in a well-ventilated area
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking
Use explosion-proof electrical/ ventilating / lighting/ equipment
Use only non-sparking tools
Take precautionary measures against static discharge
Keep container tightly closed

Response

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing
If eye irritation persists: Get medical advice/attention
IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/ shower
IF INHALED: Remove person to fresh air and keep comfortable for breathing
Call a POISON CENTER or doctor if you feel unwell
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing

IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician
Rinse mouth
Do NOT induce vomiting
In case of fire: Use dry sand, dry chemical or alcohol-resistant foam to extinguish

Storage

Store in a well-ventilated place. Keep container tightly closed
Store locked up

Disposal

Dispose of contents/container in accordance with local/regional/national/international regulations

Other Information

No data available

3. COMPOSITION/INFORMATION ON INGREDIENTS

CHEMICAL NAME	CAS #	WT %
Acetone	67-64-1	90-100

4. FIRST-AID MEASURES**Description of first aid measures****General advice**

Show this safety data sheet to the doctor in attendance.

Inhalation

Remove to fresh air. IF exposed or concerned: Get medical advice/attention.

Eye contact

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Keep eye wide open while rinsing. Do not rub affected area. Get medical attention if irritation develops and persists.

Skin contact

Wash skin with soap and water.

Ingestion

Do NOT induce vomiting. Clean mouth with water and drink afterwards plenty of water. Never give anything by mouth to an unconscious person. Call a physician.

Self-protection of the first aider

Avoid contact with skin, eyes or clothing. Wear personal protective clothing (see section 8).

Most important symptoms and effects, both acute and delayed:

Prolonged or repeated contact may cause defatting and drying of the skin. Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision. Ingestion of this product would cause headache, dizziness, fatigue and central nervous system depression. Vapors are moderately irritating to the respiratory passages. Vapors are irritating to eyes. Contact with solution may cause moderate to severe eye irritation. May cause lung damage if swallowed. If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath and or fever. Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance. Inhalation of high vapor concentrations may cause central nervous system depression resulting in dizziness, light headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death.

Indication of any immediate medical attention and special treatment needed:**Note to physicians**

Treatment based on sound judgment of physician and individual reactions of patient. Aspiration into the lungs will result in chemical pneumonitis.

5. FIRE-FIGHTING MEASURES**Suitable Extinguishing Media**

Use DRY chemicals, CO2, alcohol foam or water spray.

Special hazards arising from the substance or mixture

Containers exposed to intense heat from fires should be cooled with water to prevent vapor pressure build-up which could result in container rupture. Do not enter confined fire space without adequate protective clothing and an approved positive pressure self-contained breathing apparatus. Vapor forms a flammable / explosive mixture with air between upper and lower flammable limits. Always stay away from ends of containers due to explosive potential. Fight fire from maximum distance. Vapors may travel along ground and flashback along vapor trail may occur. This material may produce a floating fire hazard. Do not use water except as a fog. Extremely flammable. Acetone/water solutions that contain more than 2.5% acetone have flash points. When the acetone concentration is greater than 8% (by weight) in a closed container, it would be within the flammable range and cause fire or explosion if a source of ignition were introduced.

Hazardous combustion products

Carbon monoxide. Carbon dioxide.

Special protective equipment for firefighters

Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Use personal protection equipment.

6. ACCIDENTAL RELEASE MEASURES**Personal precautions, protective equipment and emergency procedures**

Ensure adequate ventilation. Use personal protective equipment as required. Evacuate personnel to safe areas. Avoid contact with skin, eyes or clothing.

Environmental precautions

See Section 12 for additional Ecological Information.

Methods and materials for containment and cleaning up

Prevent further leakage or spillage if safe to do so.

7. HANDLING AND STORAGE**Precautions for safe handling**

Flammable. Launder contaminated clothing prior to reuse. Do not cut, drill, grind, weld or perform similar operations on or near containers. Empty containers may contain hazardous product residues. Fixed equipment as well as transfer containers and equipment should be grounded to prevent accumulation of static charge. Vapors may accumulate and travel to distant ignition sources and flashback. Hot surfaces may be sufficient to ignite liquid even in the absence of sparks or flames. Extinguish pilot lights, cigarettes and turn off other sources of ignition prior to use and until all vapors are gone. Do not pressurize drum containers to empty them. Avoid breathing vapors and prolonged or repeated contact with skin.

Conditions for safe storage, including any incompatibilities

Store in a cool, dry, well ventilated area, away from heat and ignition sources. Use explosion-proof ventilation to prevent vapor accumulation. Bulk storage tanks should be diked. Vapors from tanks should not be released to atmosphere. Containers of this material may be hazardous when empty since they retain product residues (vapors, liquid). Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION**Control parameters**

Exposure limits are listed below, if they exist.

CHEMICAL NAME	EXPOSURE LIMIT ACGIH
Acetone	500 ppm STEL
67-64-1	250 ppm TLV-TWA

Consult local authorities for recommended exposure limits.

Appropriate engineering controls**Engineering controls**

Electrical and mechanical equipment should be explosion proof. Local ventilation recommended where mechanical ventilation is ineffective in controlling airborne concentrations below the recommended occupational exposure limit. Make up air should always be supplied to balance air exhausted (either generally or locally). For personnel entry into confined spaces (i.e. bulk storage tanks) a proper confined space entry procedure must be followed including ventilation and testing of tank atmosphere. Concentrations in air should be maintained below lower explosive limit at all times or below the recommended threshold limit value if unprotected personnel are involved. Mechanical ventilation is recommended for all indoor situations to control fugitive emissions.

Individual protection measures**Eye/face protection**

Chemical safety goggles and/or full face shield to protect eyes and face, if product is handled such that it could be splashed into eyes.

Hand protection

Appropriate chemical resistant gloves should be worn. Butyl rubber gloves. Ethyl Vinyl Alcohol Laminate (EVAL).

Skin and body protection

In confined spaces or where the risk of skin exposure is much higher, impervious clothing should be worn.

Respiratory protection

If exposure exceeds occupational exposure limits, use an appropriate NIOSH-approved respirator. Use a NIOSH-approved chemical cartridge respirator with organic vapor cartridges or use a NIOSH-approved supplied-air respirator. For high airborne concentrations, use a NIOSH -approved supplied-air respirator, either self-contained or airline breathing apparatus, operated in positive pressure mode.

General hygiene considerations

Avoid contact with skin, eyes or clothing. Wear suitable gloves and eye/face protection. Do not eat, drink or smoke when using this product.

9. PHYSICAL AND CHEMICAL PROPERTIES**Information on basic physical and chemical properties**

Appearance	
Physical state	Liquid
Colour	Colorless
Odour	Pungent Fruity Characteristic
Odour threshold	No data available
pH	Not applicable
Melting point / freezing point	-94°C / -137°F
Boiling point	56.1°C / 132.9°F
Flash point	-18°C / 0°F Tag Closed cup
Evaporation rate	11.6
Flammability (solid, gas)	No data available
Flammability Limit in Air	
Upper flammability limit	12.6
Lower flammability limit	2.6
Vapor pressure	>181 mm Hg @ 20°C
Relative vapor density	2
Specific gravity	0.792
Water solubility	Completely soluble
Solubility in other solvents	No data available
Partition coefficient	-0.24
Autoignition temperature	465°C / 869°F
Decomposition temperature	No data available
Explosive properties	No data available
Oxidizing properties	No data available

10. STABILITY AND REACTIVITY**Reactivity/Chemical Stability**

Stable.

Possibility of hazardous reactions

No additional remark.

Hazardous polymerization

Will not occur.

Conditions to avoid

Avoid excessive heat, open flames and all ignition sources. Direct sunlight.

Incompatible materials

Strong oxidizers. Strong acids and bases. Reducing agents. Aldehydes. Ammonia. Peroxides. Chlorine compounds. Acetone may form explosive mixtures with chromic anhydride, chromyl alcohol, hexachloromelamine, hydrogen peroxide, permonosulfuric acid, potassium tertbutoxide, and thioglycol.

Hazardous decomposition products

Decomposition products can include and are not limited to: Carbon monoxide. Carbon dioxide.

11. TOXICOLOGICAL INFORMATION**Information on likely routes of exposure****Inhalation**

Vapors are moderately irritating to the respiratory passages. Inhalation of high vapor concentrations may cause central nervous system depression resulting in dizziness, light headedness, headache, nausea and loss of coordination. Continued inhalation may result in unconsciousness and death.

Eye contact

Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision. Vapors are irritating to eyes. Contact with solution may cause moderate to severe eye irritation.

Skin contact

Prolonged or repeated contact may cause defatting and drying of the skin. Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance.

Ingestion

Ingestion of this product would cause headache, dizziness, fatigue and central nervous system depression. May cause lung damage if swallowed. If material enters lungs, signs and symptoms may include coughing, choking, wheezing, difficulty in breathing, chest congestion, shortness of breath and or fever.

Information on toxicological effects**Symptoms**

Acute skin contact with Acetone is either slightly irritating or not irritating, based on animal and limited human information. Prolonged or repeated contact may cause defatting of the skin and produce dermatitis (dryness, irritation, redness and cracking). Eye contact with vapor or liquid may cause mild - severe irritation and may cause corneal injury. Depending on the concentration, the effects of inhalation may be: irritation of the nose and throat, headaches, light-headedness and tiredness, dizziness, drunkenness, drowsiness, nausea and vomiting. Unconsciousness may result if exposure is extremely high (greater than 10000 ppm). Intolerable nose and throat irritation would also occur at these concentrations. Even higher concentrations can cause collapse, coma and death. Tolerance to the effects of acetone can develop. No effects or minor effects (slight drowsiness) are expected with ingestion. If acetone is aspirated (breathed into the lungs during ingestion or vomiting) it can cause severe, life-threatening lung injury. Animal information suggests that acetone would be difficult to aspirate because it evaporates so quickly. Based on its physical properties, acetone can be aspirated into the lungs during ingestion or vomiting. Acetone has increased the liver toxicity of chemicals, such as carbon tetrachloride, chloroform, trichloroethylene, bromodichloromethane, dibromochloromethane, N-nitrosodimethylamine and 1,1,2-trichloroethane, the lung toxicity of styrene and the toxicity of acetonitrile and 2,5-hexanedione in laboratory animals. It appears to inhibit the metabolism and elimination of ethyl alcohol, thereby potentially increasing its toxicity. Acetone can either increase or decrease the toxicity of 1,2-dichlorobenzene, depending on the concentration of acetone used.

Numerical measures of toxicity

CHEMICAL NAME	ORAL LD50	DERMAL LD50	INHALATION LC50
Acetone 67-64-1	5800 mg/kg (Rat)	> 15700 mg/kg (Rabbit)	50100 mg/m3 (Rat), 8h

Delayed and immediate effects as well as chronic effects from short and long-term exposure**Skin corrosion/irritation**

Prolonged or repeated contact may cause defatting and drying of the skin. Defatting dermatitis signs and symptoms may include a burning sensation and/or a dried/cracked appearance.

Serious eye damage/eye irritation

Eye irritation signs and symptoms may include a burning sensation, redness, swelling, and/or blurred vision. Vapors are irritating to eyes. Contact with solution may cause moderate to severe eye irritation.

Respiratory or skin sensitization

No information available.

Carcinogenicity

No information available.

CHEMICAL NAME

Acetone

OSHA

Not available

Reproductive Toxicity

The available information suggests that inhalation of Acetone can cause fetotoxicity in rats and mice and embryotoxicity in mice, but only in the presence of maternal toxicity. Negative mutagenicity results have been obtained in tests using cultured mammalian cells and bacteria. Sperm effects have been observed in rats already experiencing kidney damage. No effects on fertility have been observed.

Specific target organ systemic toxicity - single exposure

May cause drowsiness or dizziness.

Specific target organ systemic toxicity - repeated exposure

No information available.

Aspiration hazard

No information available.

12. ECOLOGICAL INFORMATION**Ecotoxicity**

CHEMICAL NAME	Ecotoxicity – Freshwater Algae (EC50)	Ecotoxicity - Fish Species (LC50)	Toxicity - Microorganisms	Ecotoxicity - Crustacea (EC50)
Acetone	Not available	4.74 - 6.33 mL/L, 96h	Not available	10294 - 17704mg/L, 48h

67-64-1		(Oncorhynchus mykiss) 6210 - 8120 mg/L, 96h static (Pimephales promelas) 8300 mg/L, 96h (Lepomis macrochirus)		(Daphnia magna) 12600 - 12700mg/L, 48h (Daphnia magna)
---------	--	---	--	--

Persistence and degradability

No information available.

Biodegradability

No information available.

Other adverse effects:

No information available.

13. DISPOSAL CONSIDERATIONS**Waste treatment methods**

It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Recover or recycle if possible. Empty containers should be recycled or disposed of through an approved waste management facility. Drain container thoroughly. After draining, vent in a safe place away from sparks and fire. Residues may cause an explosion hazard. Do not puncture, cut or weld uncleaned drums.
