

MORE DIAGNOSTICS, INC.

MATERIAL SAFETY INFORMATION

Attention: Safety Director

Product: **i-STAT BNP Controls and Calibration Verification Set**

i-STAT BNP Controls are not considered to be or to contain hazardous chemicals based on evaluations made by our company under the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

The product is made of human-based EDTA plasma and analytes with trace amounts of preservative and stabilizers added, and is packaged in 1 mL vials. A spill of that volume would have insignificant chemical content, and can be cleaned up with a disposable wipe. The wipe should promptly be discarded in a biohazard container.

Although there is no chemical hazard associated with this product, any material of human origin should be treated as a biohazard. Biohazard warnings are included in the package insert Instructions For Use.

Harry R. Holden
QA/RA Officer
More Diagnostics, Inc.
