

PRODUCT FACT SHEET

NON-ASBESTOS FRICTION PRODUCTS

Product

Brake shoes, brake linings, disc brake pads, clutch facings and other friction products.

Potentially Hazardous Ingredients

Lead, glass fibers, silica, talc, graphite, carbon black - Products contain non-asbestos materials coated with phenolic and cashew resin binders.

Physical Hazards

Non-asbestos friction products do not present any unusual fire, explosion or reactivity hazards.

Health Hazard Data

Inhalation of excessive concentrations of certain non-asbestos materials may cause health problems such as pneumoconiosis and other lung damage. Chronic exposure to lead can affect kidneys, blood, gums, gastro-intestinal system, and central nervous system.

Waste Disposal Method

Dispose of materials and dust in compliance with local, state and federal regulations.

Special Protection Information

Special clothing is required if the OSHA P.E.L. for lead is exceeded.

Special Precautions

When handling and removing non-asbestos friction materials, precautions should be observed to prevent dust from being inhaled. Standard industrial hygiene practices, including good housekeeping and vacuuming or wet cleaning work surfaces to prevent dust from becoming airborne, should be implemented.
