3 COMPOSITION / INFORMATION ON INGREDIENTS													
Chemical characterisation	Solid bases plus additives – see section 1.6 The CHIP/CLP classifications required in this section are related to that of the product supplied. To comply with the legislation the classification of the relevant ingredients of the product, as if they were present at 100%, must be outlined. Where ingredients are present in the product at very low concentrations the level of risk to the user is reduced, hence the reason that the classifications for the individual components and the product are different
