(4) **FIRST AID MEASURES**

<u>Exposure Route</u>	<u>Symptom</u>	<u>Treatment</u>
INHALATION	Irritation to nose, throat, lungs, respiratory tract.	Remove to fresh air. If symptoms of coughing, choking or wheezing prove troublesome, or recovery is not rapid, seek medical attention.
SKIN CONTACT	May cause irritation, especially under moist conditions.	Drench skin with plenty of water. Remove contaminated clothing. If irritation persists after rinsing with water, consult a medical advisor.
EYE CONTACT	Strong irritation, corrosion.	Rinse thoroughly with clean water or buffered eye wash for at least 15 minutes. Obtain medical attention.

(5) **FIRE-FIGHTING MEASURES****Suitable**

Extinguisher: FOAM, DRY POWDER, CO₂

Special Precautions: Trifectant powder itself is not flammable, but may assist combustion of other materials under exceptional circumstances, e.g. when involved in a fire.

Special Protective Equipment: Fire-fighting personnel are required to wear self contained breathing apparatus in the event of a fire involving Trifectant powder, since release of Sulphur dioxide gas may occur.

(6) **ACCIDENTAL RELEASE PROCEDURES**

Personal Precautions: Wear protective equipment (see section 8). Prevent build up of dust as far as possible and remove sources of ignition.

Environmental precautions: Do not allow the crushed or whole tablets to enter drains or water courses. Small quantities (<1kg) however may be diluted to waste via a treatment facility with large quantities of water. Observe local restrictions.

Methods for Cleaning up: Sweep up carefully to prevent formation of dusts, preferably with aid of a suitable dry anti-dusting agent if available. Keep product dry, if possible, during clean-up procedure. Place in suitable containers for disposal. Prevent powder from becoming moist whilst awaiting disposal, if possible. Clean affected area thoroughly with water. Moist product awaiting disposal must be kept away from combustible material and stored in manner which allows suitable ventilation of the waste.

(7) **HANDLING AND STORING**

Precautions during handling: Handle with sufficient care to prevent dust build up. Mix in a well ventilated area. Wear protective clothing. (see section 8).
Where significant dust formation occurs the use of a suitable dust mask may be required (see section 8).

Storage: Keep containers tightly sealed and avoid coming into contact with moisture, during storage. Keep away from combustible material.

(8) **EXPOSURE CONTROLS/PERSONAL PROTECTION**

Engineering measures: Appropriate Local Exhaust Ventilation (L.E.V.) is necessary for handling the product in situations where dust formation is a problem ie. product in bulk quantities. Not normally necessary for preparation of solutions from 50g, 2.5kg, 1kg and 5kg packs.

Control Parameters: Respirable dusts - 10mg/m³ 8 hr T.W.A. (OES EH40 2002).
Potassium persulphate – 1mg.m³ 8hr T.W.A (OES EH40 2002).

Personal Protection:

Respiratory: Powder Concentrate:
Where necessary, dust mask for fine particles (eg. 3M Type 8710).

Diluted Product:
When working in mists of Trifectant solution, respiratory protection in the form of a type AP (organic vapour - particulate matter) filter is recommended.

Hand: Rubber gloves

Eye: Goggles or face-shield

Skin: Overalls may be required for dealing with large spills or when handling the product in large quantities.
